GREAT ACTIVITY AT THE MAPLE LEAF COLLIERIES

More Buildings Are Being Erected and Considerable Machinery Being Installed--Coal Is of Highest Quality and Daily Output Is Increasing--Collieries Under Good Management.

A visit to the new town of Maple Leaf gives one an impetus which prevails in a real live and active community. The management of the Maple Leaf Collieries seem to be specially endowed with the spirit of progressiveness which is so characteristic of the growing west. They have proven this by the large additions they have made to their plant, by the successful operation of their valuable property and the great demand for their product which consists of high-grade steam and domestic coal.

The Maple Leaf Collieries, which commenced operations on their large property at Maple Leaf only a short time ago, have now 125 men at work mining and shipping upwards of 500 tons of coal per day. A new slope has been driven 460 feet down in the mine to reach the coal at a lower level and to make the work inside much easier and more profitable. Besides the one 150 h. p. boiler already in use, another of the same size is now on the w[illegible] from St. Catherines, Ont., [illegible] it will be immediately installed. A 75 h. p. hoist has been installed at the mine and is used in taking the coal from the slope. The mine is well ventilated by a Sirocco fan driven by electricity and having a capacity of 50,000 cubic feet of air per minute. The several stores and office buildings are lighted by electricity furnished by a Robb high speed 125 h. p. engine with generator. Track scales with a capacity of 150 tons have been erected near the tipple, and is used in weighing the coal as it passes from the mine. A stable to accommodate twelve horses has just been completed. One Canadian-Rand air compressor 14x22 feet with air receiver, has just been added to the plant. A boiler house, power house and lamp house, the latter equipped with 150 safety lamps, are among the recent additions to the plant. A wash house, with lockers, shower baths and all latest equipment is being erected and will be ready for use in a few weeks. A large building for office purposes has also been decided upon and all material for the construction of same is on the grounds and will be utilized in the course of the next few weeks.

The Maple Leaf Collieries has [illegible] expert and efficient general [illegible]nager in Mr. James Findla[illegible] J. G. Evan. Under such good management, the prospects for the Maple Leaf Collieries are most encouraging and ere long this prosperous mining camp will have developed into wonderful greatness.

Sanatorium Holds Opening Ball

The Rocky Mountain Sanatorium was the scene of merriment Friday evening last when the opening season ball was given. A large crowd was in attendance, people coming in from as far east as Medicine Hat and from north as far as Calgary, which showed that the popularity of this institution had not decreased one iota. The building was beautifully and tastefully decorated and presented a very pleasing appearance. Macleod orchestra was in attendance and provided excellent music for the benefit of terpsichorean activity which was commenced about 9 o'clock and which was continued until midnight when a dainty supper was enjoyed by a tired but merry crowd. After the supper was served in the large room in the basement and the innerman entirely satisfied. the happy party returned to the dance hall where the "light fantastic" was again indulged in and kept up until about 4 a m. when all returned to their respective places of abode declaring that this season's opening ball at the Rocky Mountain sanatorium was the most elaborate and successful affair of its kind ever known in The Pass.

The Rocky Mountain sanatorium is becoming widely known because of the miraculous cures that have been wrought there to people suffering from sciatica, lumbago, rheumatism, stiff joints and many other complaints. The beneficial qualities of the sulphur springs have been declared by doctors to be fully as great as those of any other sulphur springs in the west. Since the first time this institution threw its doors open to suffering humanity nearly eighteen months ago, hundreds of people have been cured of pains and aches which heretofore had made life to them almost unbearable. The newly appointed manger, Mr C. Vinet. is leaving nothing undone to make the sanatorium a delightful place for those who wish to spend a few days or more among the majestic mountains climbing their smooth faces to the high peaks which point to heaven and taking in the other beautiful scenery which is so evident around these parts, and the genial manager is also very attentive to the comforts of those who come suffering with contortions of pain and looking for relief which is so often found at the famous sulphur springs at Frank.

Bellevue's Fertile Soil

The fertility of the soil in these parts is much greater than many people even think. Beautiful gardens bearing onions, cabbages, turnips, carrots, beet, cauliflowers, potatoes and a number of othe popular and palatable vegetables, should be very plentiful in these mining camps where, with excellent soil and an abundance of sunshine, most vegetables and small fruits are sure to thrive. A visit to Mrs. Rudd's garden, at Bellevue, where vegetation shoot upward so quickly that one can almost see it grow, should convince one of the richness of the soil and should induce many others to "go and do likewise." Mrs. J B. Rudd has a splendid garden of onions, cauliflower, cabbage, lettuce and several other vegetables near her residence and amazed visitors to that part are becoming convinced that property owners could well utilize their evening hours by growing vegetables for their own consumption.

GREAT BOOM ON AT BELLEVUE--NEW TOWNSITE

Bellevue is in the midst of a great boom and great plans are being made for the future A number of enterprising business people from outside places have been looking over the ground and several have decided to locate in Bellevue.

The West Canadian Collieries have Messrs. Woods and Steele engaged surveying about 200 acres which will be put on the market in the course of the next few days. This property is a new townsite and will consist of between 1,500 and 1,600 lots.

The present cottages owned by the coal company will be sold to the miners at a small price. The land around these houses may be greatly beautified and made into nice gardens. Electric lights will be installed in all the buildings on the property formerly owned or still owned by the company. Water will also be extended to all parts of the new town site and everything possible will be done for the convenience of the people.

Among those who have decided to come to Bellevue and erect business blocks are, J. W. Gresham, who will build a blacksmith shop 21x60 feet; A.Goyette will have a concrete building erected which will be divided up into three stores; Crows' Nest Hardware Co., of Frank, will establish a branch business in Bellevue; the Union Bank is also having a building erected.

Sick headache results from a disordered condition of the stomach, and can be cured by the use of Chamberlain's Sto[illegible] Liver Tablets.

Cowley Notes

W. G. Askey motored to Blairmore on Monday and returned home the same night.

Prospects are exceedingly bright for this season's crops and unusual activities are in progress.

M. B. Dawson, of Blairmore, was in town on Saturday, peddling Lethbridge and Blairmore real estate.

The Farmers' Association held a meeting here on Saturday last, attended by a large representation from all over the district.

Great interest is being taken in football, baseball and polo, and this season promises to be one of great interest and success for the local teams.

W. E. Tustain has purchased the furniture and hardware business of W. C. Robinson, and Mr. Robinson will devote all his time to farming and ranching.

We regret to learn of the illness of Thos. Madden, proprietor of the Windsor hotel at Lundbreck. Mr. Madden contracted a cold while on a motor voyage through The Pass about ten days ago, and is now under the care of Dr. Johnston.

A. Thompson left on Saturday for the Old Country, where he will enjoy a six weeks' holiday with relatives and friends. Mr. Thompson has for some time been under medical treatment, suffering from varicose veins, and but two weeks ago came out of the Frank hospital. We hope that "Sandy" will return to his old vocation fully recovered.

A handsome silver cup is on exhibition in McIvor's drug store. This cup was won by Mr. J. C. Drewry as first prize for Percherons at the recent horse show at Macleod. It is one of the finest specimens ever introduced to Southern Alberta, and Mr. Drewry is to be congratulated on being the successful competitor. Besides winning first prize for Percherons, Mr Drewry was winner of several other first and second prizes at the Macleod show.

NOTICE TO CREDITORS

IN THE ESTATE OF FEDERICO CALABRESE, late of the Village of Blairmore, in the Province of Alberta, deceased.

NOTICE IS HEREBY GIVEN that all persons having any claim or demands against the late Federico Calabrese who died on or about the 25th day of March, 1912, at Blairmore, in the Province of Alberta, are required on or before the 15th day of May, 1912, to send by post prepaid to THE TRUSTS AND GUARANTEE COMPANY, LIMITED, at Calgary, Administrator of the said estate, or to deliver to the undersigned Solicitors for the said Company their names and addresses and full particulars of their claims in writing and a statement of their accounts and the nature of the securities if any held by them and such statement shall be verified by Statutory Declaration of the claimant or his agent.

DATED AT CALGARY, this 26th day of April, 1912.

THE TRUSTS AND GUARANTEE COMPANY, LIMITED.
Public Administrator.
C. H. LEY,
Manager of Estates.

YOUR BABY'S SKIN

Is the most delicate fabric in the world. You may cause it permanent harm by using poisonous mineral ointments for the little rashes and eruptions that every baby suffers from occasionally. Don't take any chances. Use Zam-Buk, the baby's best balm.

Zam-Buk is made from fine herbal extracts, and is free from any harmful poisonous coloring matter. Like the grasses and the flowers, nature has colored it green. It is nature's own healer!

Most ointments and salves have, as their foundation, various animal oils and fats. Zam-Buk does not contain one atom of animal substance. Most ointments and salves are too coarse to be absorbed by the tender delicate skin of a baby, and remain on the skin an irritating mass. Just put a little Zam-Buk on baby's skin, and see how soon it is absorbed, showing conclusively that the pores of the skin are greedy for it.

Use nothing but Zam-Buk for baby's skin troubles and wash with Zam-Buk Soap.

Zam-Buk should also be used for cuts, burns, scalds, eczema, piles, ulcers, etc. All druggists and stores sell at 50c. box, or post free from Zam-Buk Co., Toronto, for price. Refuse harmful substitutes and imitations.

The Tell-Tale Thumb.

The thumb confesses the man; no man is clever enough to deceive it. It has been divided into three parts, typifying the three qualities that master the world—will, logic, and love. The first, or nail phalange, signifies will; the second logic, the third, which is the boundary of the Mount of Venus, love.

When the thumb is unequally developed and the first phalange is extremely long, it is neither love nor logic that governs the individual, but merely sheer will. If the middle phalange be much longer than the first, reason predominates; yet the man may not have the power to will himself to do that which his reason dictates.

When the third phalange is long and the thumb is short, man is revealed as the slave of the senses, guided neither by will nor reason.

If the thumb is supple-jointed, the individual is easy-going, spendthrift, careless of time, money, energy, opportunity and all things.

If it be firm-jointed he is cautious, watchful, keen, diplomatic, tireless in planning, confident and sure of success, self-possessed and self-controlling.

The Ventriloquy of Birds

Whence and why is the power of ventriloquy that many birds possess? (asks a writer in the Nation.) The meadow-pipit, or the cornbrake, can sit in one place and make its voice seem to come from many alternate spots. It may be a trick impressed by the [illegible] means for bewilder- [illegible] and danger call seem, to ou[illegible] ears at any rate, to be the same in these species. The cornbrake must be of an artistically playful disposition, for he calls like that, now near, and far, when he is, undoubtedly calling his mate.

Dickens And Miss Weller.

Dickens himself was once embarrassed by one of his names. This was when he was presented to a Miss Weller, whose beauty and talent delighted him. He described to a friend his mixed feelings at finding the name he had made grotesque borne by so gracious a lady. He afterwards introduced a friend, and a marriage followed in time. On the morning after that first meeting Dickens sent to this unforeseen kind of Weller some verses in which he protested his regret that he could not hope to change her name for he was married and "Pickwick" was published.

Not That Kind of Sinner

A story is told of a certain clergyman who was fond of making sharp remarks. One day, after a fall of snow, he was wending his way along a country road in company with a parishioner. His companion suddenly stepped upon a hidden slide, and came down with a thud.

Looking gravely down at him, the pastor solemnly said:—

"Ah, my friend, sinners stand on slippery places."

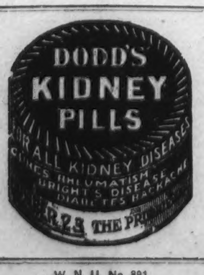
"Yes, I see they do, but I can't," was the indignant rejoinder of the fallen member of his flock.

"Times is fierce," declared Susan Brett. "Half the managers on Broadway owe me money"

"Back salary or alimony?" politely queried Yorick Hamm.—Courier Journal.

A beggar in Dublin had been long besieging an old, gouty, testy, limping gentleman, who refused his mite with much irritability, on which the mendicant said:—

"Ah, please your honor's honor, I wish your heart was as tender as your toes."



King George at Home.

When King George entered his private room on his return from his Indian visit he found a mass of correspondence arranged for his examination that made him smile. "Enough work here for a month, I suppose," he remarked to Lord Stamfordham. It was plain that he was only too anxious to get to work. His quick, alert manner, of moving about, glancing with pleasure at various objects in his apartments, pausing every now and then to make some brief reference to matters that immediately interested him, was gratifying to behold, since it indicated better than anything else could have done the downright joy that he felt at being back in his London "home," while it equally conclusively demonstrated that his health had not been impaired by the fatigues of the last few months.

When Colds Hang On

You Can Be Sure the Vitality of The System Is Running Low.

Fortify Yourself Against Pneumonia And Consumption by Using.

DR. CHASE'S NERVE FOOD

You catch cold easily. One cold is not gone till the next one comes. You are unable to shake yourself free, and as a result your system is gradually becoming weaker and weaker.

This is the way to pneumonia or consumption. Colds only hang on when the system is in a weakened or run-down condition, and the blood lacks the richness which is required to fight off the disease germs.

Dr. Chase's Syrup of Linseed and Turpentine will free you of the cold, but you must build up the system by using Dr. Chase's Nerve Food or you leave yourself open to renewed attack.

Colds do not bother the person whose blood is pure and rich and whose nervous system is filled with energy and vigor. You can fortify yourself against colds and you can ward off such frightful diseases as pneumonia and consumption by using Dr. Chase's Nerve Food.

By a few weeks' use of this great food cure you can build up a reserve force which will enable you to fight off disease and to better accomplish your work in life. Rich, red blood is the greatest of germicides, and there is nothing like Dr. Chase's Nerve Food to form new blood and restore snap, vigor and energy to mind and body. 50 cents a box, 6 boxes for $2.50, at all dealers or Edmanson, Ba[illegible] Limite[illegible]

Bullet Proof Shield.

Lieut. Bisbini of the Thirty-second Infantry, who is now at Tripoli, has invented a bullet proof shield which can be put to different uses with great advantage. The shield consists of a light plate of tempered steel 12 inches wide and 16 inches long, shaped like a spade. When fitted to one of the tent poles the shield can serve the purpose of a spade for digging trenches in the sand. In skirmishing soldiers can use it to take cover by lying on the ground and firing from behind the shield through the hole, which is large enough to admit the barrel of the rifle. The shield can also be used when soldiers fire kneeling, and in bayonet charges it can be strapped over the left arm and serve the purpose of a regular shield. On the march the shield, which is very light is hung over the knapsack. The Bisbini shield has been experimented with successfully and found bullet proof at 100 yards, so that very probably it will be adopted as an essential part of the equipment of infantry soldiers.

Minards Liniment for sale everywhere.

Secret of Long Life.

The true secret of health and long life lies in very simple things. Don't worry. Don't overeat. Don't starve. Fresh air day and night. Sleep and rest abundantly. Spend less nervous energy each day than you make. Be cheerful. "Work like a man, but don't be worked to death." Avoid passion and excitement. Associate with healthy people. Health is contagious as well as disease. Don't carry the whole world on your shoulders, far less the universe. Never despair. "Lost hope is a fatal disease."

PILES CURED IN 6 TO 14 DAYS
Your druggist will refund money if PAZO OINTMENT fails to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days. 50c.

It is to live twice when you can enjoy the recollection of your earlier life.

Smart!

Brown—"I say, Smith, are you good at conundrums?"

Smith—"My boy, I am great at such things, Fire away."

Brown—"Well, if it takes a man three days to chew a ham weighing ten pounds, how long will it take the same man to chew a hammer weighing six pounds?"

Smith (after considering some time)—"I'll give it up, old chap."

Brown (as he prepares to dodge things)—"It will depend whether he is a professional or a hammer-chewer."

Agent (to sour-faced but wealthy old lady): "Madam, I am, soliciting funds to start a benevolent enterprise for the poor blacks of Africa, and I thought—" Sour-faced Lady: "I can't give you money, sir; I have been swindled too often. All I can do is to lend my countenance to the scheme." Agent (sadly): "That would simply ruin it, ma'am."

Industrial Accidents.

According to the record of industrial accidents kept by the Department of Labour, 61 persons were killed and 178 injured during February, 1912. This record compares very favourably with that of January, when 86 workmen were killed and 214 injured. Compared with February, 1911, the record is still more favourable, as 93 were killed and 197 injured in that month. The worst disaster of the past month was the premature explosion of dynamite on construction work near Fort Frances, Ont., on the line of the Canadian Northern Railway, by which 13 construction hands were killed and six others seriously injured.

Two-year-old Harry had never seen a live lamb, his only knowledge of that animal being derived from a toy one on wheels. While visiting grandpa on the farm he was taken to the sheep pen to see the lambs. After looking at them for a few minutes, he looked up at grandpa with a puzzled expression, and asked, "Where's the wheels?"

They Soothe Excited Nerves.—Nervous affections are usually attributable to defective digestion, as the stomach dominates the nerve centres. A course of Parmelee's Vegetable Pills will still all disturbances of this character, and by restoring the stomach to normal action relieve the nerves from irritation. There is no sedative like them and in the correction of irregularities of the digestive processes, no preparation has done so effective work, as can be testified to by thousands.

A Yukon Bonanza.

one of the best since the days of the Klondike discovery in 1898 was made here last week, about seventy miles from the mouth of Sixtymile River, 120 miles southwest of Dawson and

A new gold discovery, regarded as twenty-five miles from the Alaska line. The find is said to average about $1 to the square foot of bedrock. Some two hundred men have already gone from here on a stampede to stake claims, notwithstanding a temperature of 30 degrees below zero and snow on the ground fifteen inches deep. A very reliable miner, who has been engaged in mining here since the gold rush in 1908, was the discoverer. He reports the formations in sinking a shaft 19 1-2 feet to bedrock as follows: Six inches of muck; 6 feet of gravel containing gold, 3 cents to the pan; 6 feet of muck and 7 feet of gravel to bedrock where the gold is found. In cleaning up the surface of the bedrock a space of 5 by 8 feet, he obtained $40 worth of high grade gold, as shown by the gold commissioner's scales here. He reports the valley in which the discovery was made to be 20 miles long and 2,000 feet wide, with good working gravel quite similar to that of the famous Bonanza Creek of the Klondike, and frozen solid from the surface to bedrock, making a safe roof for mining.

[illegible] may be other corn [illegible] head of the list so far as results are concerned.

Your Mother

Do not forget to manifest an interest in whatever interests or amuses her. Though she is old and wrinkled she loves pretty things. Make her frequent simple presents, and be sure they are appropriate and tasteful.

Remember that she is still a girl at heart, so far as delicate little attentions are concerned. Give her your full confidence, and never do anything which you think she would disapprove. Make her a partaker, so far as your different ages will permit, in all your pleasures and recreations.

Lift all the burdens you can from the shoulders that have grown stooped in waiting upon and working for you. Never intimate by word or deed that your world and hers are different, or that you feel in any way superior to her.

Treat her with the unvarying courtesy and deference that you accord to those who are above you in rank or position. Study her tastes and habits, her likes and dislikes, and cater to them as far as possible in an unobtrusive way.

Bear patiently with all her peculiarities or infirmities of temper or disposition, which may well be the result of a life of care and toil. Remember that her life is monotonous compared with yours, and take her to some suitable place of amusement or for a little trip to the country, or to the city if your home is in the country, as frequently as possible.

Explained

Didn't some idiot propose to you before our marriage?"

"Certainly."

"Then you ought to have married him."

"That's just what I did."—Stray Stories.

CURED OF CONSTIPATON

Mr. Andrews praises Dr. Morse's Indian Root Pills.

Mr. George Andrews of Halifax, N.S., writes:

"For many years I have been troubled with chronic Constipation. This ailment never comes single-handed, and I have been a victim to the many illnesses that constipation brings in its train. Medicine after medicine I have taken in order to find relief, but one and all left me in the same hopeless condition. It seemed that nothing would expel from me the one ailment that caused so much trouble, yet at last I read about these Indian Root Pills.

That was indeed a lucky day for me, for I was so impressed with the statements made that I determined to give them a fair trial.

They have regulated my stomach and bowels. I am cured of constipation, and I claim they have no equal as a medicine."

For over half a century Dr. Morse's Indian Root Pills have been curing constipation and clogged, inactive kidneys, with all the ailments which result from them. They cleanse the whole system and purify the blood. Sold everywhere at 25c. a box. 2

MOONEY'S BISCUITS

ONE TIRED WOMAN AND ONE LITTLE OVEN

You have probably been there yourself—perhaps are right now.

Bright women all over Canada are getting away from this. They welcome **MOONEY'S BISCUITS** as a most acceptable substitute for their own bread and biscuits.

MOONEY'S PERFECTION SODA BISCUITS

are the crispest, creamiest crackers made. Better still, they are baked in Winnipeg; right at your very door. They come to you fresh as the product of your own oven.

You can have them in air-tight packages or sealed tins as you prefer.

Walding, Kinnan & Marvin,
Wholesale Druggists, Toledo, O.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price, 75c. per bottle. Sold by all Druggists.

Take Hall's Family Pills for Constipation.

A young woman entered a shoemaker's establishment and said to the salesman—"I think these Louis the Fourteenth heels are too high for me. Give me a size lower, please. Or perhaps Louis the Thirteenth would be high enough!"

Minard's Liniment Cures Dandruff.

His Excuse.

She—"You didn't seem to like the new symphony at the concert last night?"

He—"No. The fact is, I ignored it."

She—"Ignored it!"

He—"Yes, Mrs. Knozitall was with us, you know, and she said she heard it in Munich last year, and I couldn't show an interest in anything as second hand as that, could I?"—Cleveland Plain Dealer.

Anaemia can be successfully treated by fruit diet, especially with bananas.

The scientific way of getting the best results from your cattle, is to get the best separator.

There are so many separators on the market, each one claiming to be the best; that buying one should be a matter of careful consideration.

$35.00 OUR 1912 MODEL HIGHGRADE $35.00

STERLING SEPARATOR

We would like to bring to your notice some points of special advantage in this machine.

The bowl is small and true-balanced, easy to run, skims quickly and cleanly. It is forged from solid steel with electrically welded spindle and can not get out of balance.

The flexible neck bearing of phosphor bronze is held in place by heavy coil spring and adjustable lock nut. This is the most approved type of bearing. It is lubricated by sight feed oil cup.

The gears are accurately cut mesh perfectly, and run with a minimum of friction. The gears are concealed and protected from dust.

One-piece Seamless supply can of heavy retinned steel. There is no place for dirt to lodge.

The skimming discs are easy to wash. The discs are slipped all together from the bowl to the cleaning rod. The discs can not become mixed. After washing they are slipped back into the bowl all at once, they are not handled one at a time. It only takes a minute to thoroughly wash them.

30 Day Free Trial

We could enumerate at considerable length, the different advantages of our separator, but we permit you to answer every question by accepting our remarkable offer. We offer you a thirty-day working trial on your own farm entirely at our risk. Your decision is final. If at the end of that time you are not satisfied in every detail you can send the separator back telling us what is wrong, and we will pay all transportation charges and return your money. Nothing we could say would prove more conclusively the confidence we have in this separator.

TELL US YOUR NEEDS

Every one expects business to increase. When ordering a separator it is always better to buy a larger one than the present needs demand. Let us know the size of your herd and we will tell you what a suitable separator will cost at your own town.

Write for our Spring and Summer Catalogue. It will save you money.

WINNIPEG CANADA

Some Mourner.

Down in Georgia a negro, who had his life insured for several hundred dollars, died and left the money to his widow. She immediately bought herself a very elaborate mourning outfit.

Showing her purchase to her friend, she was very particular in going into detail as to prices and all incidental particulars. Her friend was very much impressed, and remarked:

"Them sho is fine close, but, befo' heaven, what is you goin' to do wid all dis black underwear?"

The bereaved one sighed:

"Chile, when I morns, I morns."—Harpers Magazine.

Quite at Home

"I hear your son has brought home a timid little bride."

"Well, she isn't so awfully backward at that. She started in right away to improve mother's game of bridge and show the girls how to dress."

Sperm whales are the richest prizes of the ocean, yielding spermaceti from the brain cases, ivory from their lower jaws, and rich yellow oil from their sides.

Let us not be too particular. It is better to have old second-hand diamonds than none at all.—Mark Twain.

A Chicago professor attributes indigestion to a pessimistic stomach, which refuses to enjoy the good things of life.

Strikes During February.

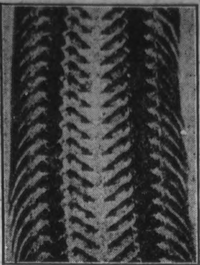
The strike situation in Canada continues on the whole favourable according to the latest reports of the Department of Labour. Few disputes of importance occurred during February, the one affecting most employees being that of the cloak and garment workers in the employ of T. Eaton Company, Toronto and Montreal. About 600 employees were affected by this dispute. Altogether there were twelve strikes in existence during February affecting about 50 firms and 1,200 employees. The loss of time in working days was approximately 10,000, compared with 12,000 days lost from the same cause during January, and over 32,000 days lost in February, 1911. Eight strikes remained in existence at the close of the month.

A group of old men were giving their reminiscences of Lincoln. "My wife collected autographs," said one. "She once wrote to Lincoln for a sentiment and his autograph, and she got in reply a note that ran—"Dear Madam.—When you ask from a stranger that which is of interest only to yourself, always enclose a stamp. There's your sentiment, and here's your autograph.—A. Lincoln!"

CHEW DIXIE TOBACCO

For the Children

A Section of a Snail's Tongue.



This queer looking picture is that of a section of the tongue of a snail. The tongue is greatly magnified to show the rasping teeth.

A snail eats by rasping off small particles with the tongue. This tongue is a narrow band or ribbon with pointed teeth set in rows across it. The common slug, often found in damp places, has more than 25,000 teeth on the tongue, which act like the ridges on a file and scrape the food into the mouth. I once watched with a magnifying lens, says a writer in St. Nicholas Magazine, a small water snail feeding as it slowly crawled up the side of an aquarium, and, although I made no very accurate count, the tongue seemed to be pressed against the glass about forty times a minute.

Man and Object.

Two persons go out of the room and, after agreeing together as to what they shall represent, come back again and sit down side by side in front of the company. One of the two takes the part of some well known person, and the other represents an object which is closely connected with that person. For instance, George Washington and the hatchet or Roosevelt and the big stick, the king of England and his crown, etc.

After the two take their seats the other players in turn ask each of them a question, to which both the man and the object must answer only "Yes" or "No" until the right person and the right article have been guessed. The first player may perhaps ask the man, "Are you alive?" The man will answer "Yes" or "No" according to the character he represents. Then the object may be asked, "Are you made of wood?" "No." Then the second player in order asks a question of each, and so on along the line until all have had a turn at questioning or until the person and object have been rightly guessed.

A Giant Baby.

The world's astronomers are now much interested in the planet Jupiter. This planet is the largest in our system, but is said by the scientists to be an infant in swaddling clothes so far as development is concerned. In volume Jupiter is 1,279 times greater than our own globe. But we are now full grown and, as some astronomers declare, on the downhill side of life. In other words, our little earth is in middle age and will soon be growing old. Great Jupiter, the king of the heavens as far as our planetary system is concerned, is not yet fit for life. From the latest observations of Jupiter it is supposed to be in the act of building, of solidifying. One astronomer says: "I have not the slightest doubt that we are assisting at the creation of a world. Under our dazzled eyes a new world is being created in the infinity, and in Jupiter we hail the world of the future."—Chicago News.

Conundrums.

What is the difference between a photographer and the whooping cough? One makes facsimiles, the other sick families.

What French word contains every vowel and but one consonant? Oiseau.

When is an altered dress like a secret? When it is let out.

How do eggs show their anger on being called "heggs?" By becoming eggs-aspirated.

What part of speech are shopkeepers most anxious to dispose of? Articles.

Why are sick persons like auto wheels? Because the are tired.—Philadelphia Ledger.

Cupid's Target—A Game.

In the game Cupid's darts are shot from a small bow by each child in turn at a heart shaped target of white with a smaller red heart for a bullseye. The one whose dart comes nearest the middle of the bullseye may receive a gayly beribboned bow and arrow for a prize.

The Two Echoes.

Two echoes, each with mouth and ears,
Lived peacefully for many years
Till one, not meaning to offend,
Said: "Let me hear your voice, my friend.
I know my voice is very fine.
But which is finer, yours or mine?"
"Mine," said the other, loud and clear,
"Mine," said the first in tones severe.
"Mine," said the other echo next.
"Mine," said the first one, rather vexed.
And "mine" was all that they would say,
And neither of them would give way,
For, though most echoes can be mute,
If spoken to they will dispute,
And I am sure these always will,
For there they are disputing still.
—Youth's Companion.

LONDON STORES.

When Customers Enter They Are Almost Compelled to Buy.

First and foremost the English excel in salesmanship. Once having got a possible purchaser inside the door, they reason he should be made profitable to them. The floor manager does not assume that attitude of royal indifference as with us. He watches the struggle beween salesperson and customer. If the latter shows signs of escaping into the open with his purse intact another clerk is brought forward as a re-enforcement. Some establishments still lay fines on clerks who do not effect sales, but the system of inciting the sales force to its utmost efforts by giving percentages is now coming into vogue.

The method that London stores have of letting a cash girl conduct a customer who has finished his purchases to a central cash desk and wrapping counter, where he stands in line, keeping an anxious eye on his goods till they are parcelled, seems to us archaic and cumbersome. An Oxford street merchant, however, reasons differently: "When a patron has finished his purchases he is better out of the way of new customers. English men and women prefer privacy when they are making purchases, which would be impossible were customers allowed to sit at the counter, awaiting their packages. Then the wrapping force works more rapidly when the patron watches and urges haste."

I did not see how that particular force could work any more slowly, but his other argument might have some merit.—Business.

SHETLAND'S TAME GULLS.

Each Family Has Its Own Flock and the Children Feed Them.

There are many small villages in the world that have only one street, but Lerwick, in Shetland, besides having only a single street, possesses only one tree. There are no birds there, not even a sparrow, but the seagulls are plentiful.

The seagulls are the sparrows of Lerwick, and as such they have a greater share in the town's life than the sparrows of London. In the morning you will note that a seagull sits on every chimney pot. Seagulls swoop and hover over every roof in town. The air is ful of their strange, high, plaintive, haunting cries.

Every house has its own familiar seagulls and every street its own band of them. But they never mix. The children in each house have a pet name for their own particular seagulls, and having called them by those names, they feed them every day.

Each seagull knows what is meant for him. No bird attached to one house ever seeks to eat the food scattered from the house next door. He does not dare to do so. So all day long the seagulls hover and call over the roofs of Lerwick.

The people of the town, if they come across a little pile of rice laid upon the roadway, step over it with care. They know that it has been placed there for some seagull. And at night the seagulls leave their appointed chimneypots and fly gracefully away to their resting places on the rocks of the Isle of Noss.—Fruit Magazine.

How Fishes Breathe.

By means of their gills fish breathe the air dissolved in water. The oxygen consumed by them is not that which forms the chemical constituent of the water, but that contained in the air which is dissolved in the water. Fishes transferred to water from which the air has been driven out by a high temperature or in which the air absorbed by them is not replaced are soon suffocated. They require aerated water to maintain life and they take it in constantly through their mouths and expel it through their gills, retaining the air. It follows that if the water in a lake should be completely cut off from contact with the air long enough to exhaust the supply of air the fish in the lake would die. It would take a severe and pretty long continued freeze to accomplish this, but it might happen and doubtless has frequently happened with a small body of water.—St. Nicholas.

Man and Woman.

Man is born an understanding and woman a love. The wife cannot enter into the proper duties of the man, nor the man, on the other hand, into the proper duties of the wife, because they differ, as wisdom and its love or thought and its affection or understanding and its will. In the proper duties of men the understanding, thought and wisdom act the chief part.—Swedenborg.

Forgetful.

Jones—What have you got that string around your finger for? Brown—My wife put it on so that I would remember something. I forgot what it was. I'm keeping it on now to remind me to ask her what it was when I get home this evening.

The Canny Agent.

"Do you suffer here from miasma?" asked the visitor to Swampville as he looked over the villa plot proposition in that charming suburb.

"No," replied the agent. "Fact is, I never knew you had the asthma."—Harper's.

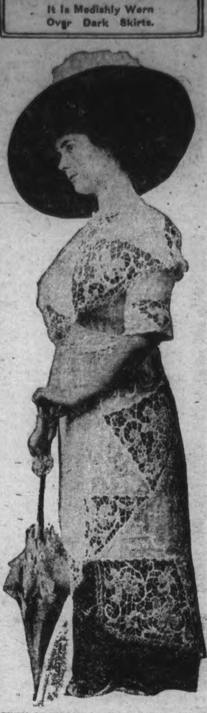
Right In Her Line.

Gillet—The people in the flat above us are constantly fighting. Perry—Doesn't your wife object? Gillet—No. She likes to have a fuss made over her. —New York Times.

There is no great genius without a tincture of madness.—Seneca.

SMART LACE TUNIC.

It Is Modishly Worn Over Dark Skirts.

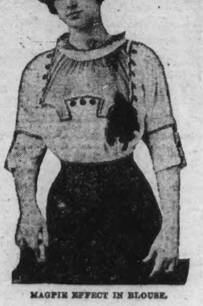


TUNIC OF CREAMY LACE AND ECRU BATISTE.

The handsome point crochet in a rich creamy tone, in combination with pale ecru batiste, is used for this very chic tunic, which wraps around the figure in the modish manner over a clinging trained skirt of navy blue satin.

For Bridge Parties.

For some occult reason known only to the designer of this waist it has been called "the bridge blouse." Possibly the gold buttons arranged as a trimming about the square corsage is supposed to suggest the coin of the realm that at some parties changes hands in a most distressing fashion. The waist is of white chiffon cloth with a front empiecement of black tulle. A big splashing chou of scarlet tulle enlivens this chic waist.



MAGPIE EFFECT IN BLOUSE.

Embroidery on Kid.

Frenchwomen are enthusiastic over the fad of using kid trimmings on their outdoor costumes. But the kid must be embroidered. Soft white or very light colored kid is used and is fashioned into belts, collars and revers bands.

Any shape that suits the fancy is used, but all must correspond. The work is done in silk and metal threads, and the raw edge of the kid is finished off with a cord of heavy thread of dull gold or silver. Any simple design can be worked out, but be sure to let the design be simple. One does not wish to cover too closely the beauty of the kid.

A favorite adaptation of the work is the loose "ceintures," or fronts, worn beneath the fashionable boleros of cloth or velvet.

The kid fits in the space between the fronts of the bolero and reaches to the belt line. It is then embroidered, using white or two tones of silk that correspond with the color of the gown.

Little loops are placed at the sides and these fastened to hooks sewed inside the bolero. Sleeve bands to match add another trig touch to the costume.

The work has many other uses besides dress trimmings. It can be made into charming opera bags, holders for various things or mounted on cardboard for picture frames, fancy boxes, etc.

LOUIS NAPOLEON'S ESCAPE.

Disguised as a Workman He Fooled the Ham Fortress Guard.

From the researches made by M. Thirria come some interesting details of the escape of Louis Napoleon from the fortress of Ham, in northern France, on May 25, 1846.

It seems that the sole credit for the escape must lie with Louis Napoleon himself. He made his valet, Thelin, buy a black wig, some rouge, a cap which was scrubbed with pumice stone and a pair of sabots. Then he cut off his mustache, put on a blue apron, a blue pair of trousers and a close fitting shirt of coarse stuff.

Some workmen were carrying out some repairs to that part of the fortress where the prince lodged, and this gave color to his disguise, so much so that the two watchmen entertained no suspicions regarding the man who walked past them and out at the great gate, a pipe in his mouth and a plank on his shoulder. The sergeant on duty at the drawbridge was reading a letter as he passed and took no notice of him. It was then 5 o'clock in the morning.

Four times that day, the last time at 5 in the afternoon, did the governor, Demarle, send for the prince. Each time Dr. Conneau replied that the prisoner could not see anybody because he had taken medicine. When at last the governor lost patience and went himself to the prince's room and walked up to the bed on which the supposed invalid was lying he discovered that a very presentable dummy had taken the place of Louis Napoleon. The discovery was made too late. By that time the fugitive was over the Belgian frontier.—Paris Journal des Debates.

A REAL MAGIC CAP.

Curious Experience of a German Organist in St. Petersburg.

Not very long ago a German organist who went to St. Petersburg to live had there an experience with a new cap that for a time almost made him believe in the magic of the Teutonic fairy tales.

The organist bought the cap during his first day at the Russian capital and wore it the next day when he went out for a walk. On his return to his lodgings he was amazed to find two gold purses in his pocket, one of which contained a sum equivalent to $50.

The next day, after his usual walk, he found four purses in his outside pocket, a find that caused him to doubt his senses. A third day, with a similar profitable result, sent him to the chief of police to tell his story.

The authorities detailed a detective to go with the German to the tailor who made the cap. Investigation disclosed the fact that it had been constructed of an odd piece of English cloth brought in by a stranger. From it the tailor had made fifteen identical caps to order. Having a bit left, he had constructed a sixteenth cap, which was the one sold to the organist.

The detective then followed the organist through the streets of the city, when the mystery was solved. The cap, it appears, was the emblem of a gang of pickpockets working co-operatively. The one who secured a purse dropped it into the pocket of the first confederate he saw. The cap had identified the German, and he had reaped the reward.

With this clew it was an easy matter for the Russian authorities to catch the whole gang.—Youth's Companion.

The Port of Workless Men.

One morning we passed through a square in Moscow containing nothing but men—wild eyed, long haired, long bearded men—men in rags, most of them, and all of them compelled to come there and wait to be hired to work. To that square must all workingmen go who seek work. The city feeds them while they wait a single small piece of black bread each day. Some never leave that square, but wait there their lifetime through. They gazed upon our handsome landau with hungry and wolfish eyes. I never before beheld so frightful, unkempt a company of hopeless, hapless, hungry human slaves as these Russian workingmen who waited for a job.—William Seymour Edwards in "Through Scandinavia to Moscow."

Wrong, but True.

"Now, Johnny," said the teacher after she had explained the meaning of the word, "I wish you would write a sentence containing 'defeat.'"

After a struggle which lasted for about twenty minutes Johnny announced that he was ready to be heard.

"Please read your composition," the teacher directed.

"When you git shoes dat's too tite," Johnny read, "it's hard on de feet."—Chicago Record-Herald.

Undecided.

"What struck you most forcibly during your visit to the city, Uncle Hiram?" asked the village oracle.

"Waal," ruminated Uncle Hiram "when I cum to in the hospital I'll be gosh dinged if I could rec'lect whether it was a trolley car or one o' them derned ottymobiles."—Philadelphia Record.

Her Strikes.

Mr. Benedict—Do you know, my dear, I think we have a pretty good cook. How does she strike you? Mrs. Benedict—For more wages about once a week.—Illustrated Bits.

Showed It.

Dora—Do you think it would be conceited of me to say I made this dress myself? Grace (sweetly)—Not conceited, dear; only superfluous.—London Watch Dog.

THE SHEPHERD.

Let the sheep out in the yards on fine days, but never expose them to storms.

Old ewes should be fattened and disposed of before they lose any teeth. They are all right, as a rule, up to six years or a little older.

Ten tons of hay will feed 100 sheep one year. The hay should be clover, alfalfa or mixed grasses, such as redtop, blue grass, alsike clover, etc.

Sheep, like other animals, are creatures of habit and should always be handled by the same attendant, who should move among them gently and give notice of his approach by speaking to the flock.

It is not wise to let the lambs shift for themselves with older sheep.

Sheep should have salt by them all the time. Keep salt in a box in the pen or pens and keep salt in it all the time. If deprived of salt they might eat too much when a fresh supply is given.

THE SUCCESSFUL COW.

Points That Indicate a Profitable Dairy Animal.

The three essentials for a successful dairy cow are vigor, capacity for food and well developed organs for milk production. The cow must have a good breathing apparatus, indicated by a large nostril, wide breast and good width across the floor of the chest. Good width here and good girth indicate a good heart. The eye is also indicative of strength and good physical condition, as well as temperament. A strong nerve system is also needed. This may be tested by running the hand along the top line of the cow in the region of the chine to find out if this is open, indicating that she has good protection and ample room for the spinal cord to run in. She also must have large organs of digestion. The good dairy cow usually is wide in the forehead, the face dished between the eyes with a strong under jaw. The head should be of medium length. She should have wide, open, well sprung ribs. The hips should be wide apart and level. In the conformation of the thighs and legs there should be ample udder room.

A twelve months' record of 9,578 pounds of milk and 425.09 pounds of butter fat qualified the Brown Swiss cow Vogel, herewith pictured, for the registry of production of the Brown Swiss Cattle Breeders' association. This equals 500.11 pounds of butter, 85 per cent fat. Vogel is a typical Brown Swiss cow of generous proportions, weighing about 1,500 pounds. She won first prize at the Illinois state fair in 1908 as a four-year-old. The official test by the University of Illinois was made under commercial farm conditions, the cow running with the herd on pasture during the summer.

The udder itself should commence well up and extend along the under line until it gradually blends with it, thus insuring the greatest capacity. The veins should be prominent, indicating a large amount of blood circulation. The milk vein which extends from the udder along the under side of the abdominal wall should be large, crooked and long. These veins bear a direct relation to the milk secreted.

In addition to these general characteristics a breeder may desire distinguishing breed characteristics and uniformity of type in his herd.

A happy combination of pedigree and selection of the animal is what is needed by the breeder. The more animals one has of high breeding quality in the pedigree the less likelihood one has of bringing together two low producing characters and getting as a result an animal of low production. It is generally conceded that the influence of parents in heredity is 50 per cent, of the grandparents 25 per cent and of the great-grandparents but 12.5 per cent. Thus an animal that is removed six or seven generations from another animal under consideration has but small influence.—Professor P. A. Campbell, Maine Experiment Station.

The Dairy Herd.

A man's dairy herd will be just what his ideas of a dairy herd are. If he gives the herd no thought it will be a poor herd with small producing ability. It is the amount of thought and applied energy that causes a man to rise above the average, whether in dairying or wheat or corn growing. A dairy herd can't be built up by growing and hauling feed alone. The man's mind and the things the mind only can do will improve the herd. These columns give you the best thought of the time in dairy herd improvement, and so does the thinking. If you will apply the thought it will be well worth your while.—Kansas Farmer.

Fresh Earth For Hogs.

If you are not situated so that you can let your hogs out, draw a load of earth and throw it over into the pens now and then. The hogs will work it over and take a lot of comfort doing it. Makes them grow faster too.

Milady's Mirror

Make Your Own Rouge.

If you are dissatisfied with the rouge you are using try making your own. A very simple way of preparing a harmless rouge is by tinting a portion of a tried and true cold cream with carmine. Be sure that only the fruit or vegetable tint is procured for tinting purposes. If a poisonous tint is used where a minute break in the skin of the face or lips is present it is liable to result disastrously, causing blood poisoning or chronic skin disease. A vegetable or fruit carmine powder worked into cold cream (not the disappearing kind) until evenly distributed and placed in a rouge box is a safe and delightful toilet adjunct and a benefit to the skin rather than an injury. By mixing equal portions of faintly pink face powder and pure rice powder a wonderfully transparent blush tint is obtained. White, as a rule, shows plainly against the skin, especially if the complexion inclines toward ivory. Pink has the equally undesirable quality of causing a natural flush to appear almost florid, besides giving a note of artificiality to the face. By blending the two and applying the result with a piece of soft white velvet a clear, flesh tone becoming to almost every complexion is acquired.

Keep Windows Open.

Don't sleep in a closed room.

Fresh air is the basis requisite to good health. A sealed chamber is a breeding place of disease.

The lungs utilize the oxygen they breathe and expel their impurities in your exhalations.

Within an hour a man consumes all the oxygen in the average room. If the windows and transoms are down and the door is shut thereafter he breathes foul poisons.

Rural communities should, by reason of natural advantages, be practically immune from the "white plague," but statistics show a greater percentage of consumptives among farmers than any other class of people.

Who isn't familiar with the deadly parlor, with its stale atmosphere, where for days at a stretch whole generations of malignant germs are permitted to incubate undisturbed. A week often passes without the admission of sunlight. As well spend an afternoon in a smoke filled tunnel as remain in such a pesthole.

Open the windows even in the rain—far better to spoil a few trumpery lace curtains and spot the carpet than jeopardize your health.

Beauty Hint For Thin Girl.

The thin girl in the morning, after a sponge bath with a thorough rub, should drink half a glassful of comfortably hot water. When appetite is felt a soft boiled egg, a piece of whole wheat bread thoroughly baked and well buttered and, a little while after, a glass of cool water, not iced, may be taken. The noonday meal should consist of a good clear beef soup, a broiled steak or roast beef, a little boiled rice, a lettuce salad with olive oil dressing and some simple dessert; for supper beef or mutton boiled and good whole wheat bread well buttered. At the close of this meal a cup of hot chocolate is taken and another of hot milk on retiring.

Perfumed Toilet Articles.

Glancing over the dressing table of the woman of exquisite taste, one of the first facts to attract attention is that all these little articles of the toilet are marked by the same odor seen on her perfume and scent bottles. Powder, talcum, lip rouge, cold creams, even manicuring articles all disclose the same mark, the result being like a breath of perfume from a bank of flowers. No conflicting and often cloying odors are present to destroy the single scent. Involuntarily you say, "You are fond of violets, aren't you?" or roses or lilacs or lilies or oriental perfumes, as the case may be. As you replace your toilet requisites try having them all of one fragrance.

A Practical Manicure.

A practical way of keeping the finger nails well in order is that to treat them to one or two strokes of the file every morning. First have them shaped and the cuticle trimmed by a manicurist, then be careful to preserve the shape when filing. In this way nails can be kept looking well for at least a month, and the regular allowance for manicuring will be a fourth or at least a half of the former amount.

Polish the tips slightly after the morning filing, but do not use the buffer until the nails are hot, as this causes them to become brittle.

Care of False Hair.

If neglected the most costly bought hair is soon worthless—worse, disease breeding. The puffs, switch or transformation should be brushed as carefully as the real hair and as often. The best way to do it is to put a towel on the lap or table and, spreading the piece on it, brush with a rubber backed boar bristle brush, wet one side, then the other. This removes tangles and does not tear the hair, as does a comb.

I.O.O.F.

Happenings in and Around Blairmore

Alex. Cameron was down from Coleman on May Day.

H. G. Bigelow was in Calgary on Wednesday attending to some business.

L. W. Michal, of London, Ont., is in town soliciting orders for Gary's safes.

Miss Sunstrum went to Calgary on Saturday and returned to town on Tuesday.

Rev. Fr. Delestre, of Coleman, was amongst the visitors in town on Wednesday.

J. G. Smith went to Fernie on Saturday evening and returned to town on Sunday.

E. L. Crain, of the mechanical department of The Enterprise, returned from his farm at Macleod, on Monday morning.

Church of England Service is held every Sunday morning at 11. a.m., excepting the 1st. Sunday of month, in the Budd Hall.

Several of our citizens went to Fernie on Wednesday and took part in the May Day celebration there. Most of them returned home sober.

On account of peculiar circumstances "Miss Nobody from Starland" did not appear at the local opera house on Tuesday evening as advertised.

The local branch of the Union Bank has just had a large cement and steel vault built at the north end of the main building E. Morino did the work and it is the largest vault in The Pass.

Miss McGaw is opening up a boarding house in the green house on Eighth avenue, just south of the C.P.R. track. All who are desirous of obtaining good board are invited to see Miss McGaw.

Rev. W. H. Irwin, the Methodist minister at Bellevue occupied the pulpit at the Central Baptist church on Sunday morning last, and his audience was delighted in listening to a well-prepared sermon.

J. Menard, the manager of the West Canadian Collieries, is very busy these days preparing plans for this season's work, installing more mine machinery, opening up more coal property and making a big increase all around.

E. Morino has commenced work on Blairmore's water system and if the water in the river remains low for two or three weeks longer, Mr. Morino expects to have the water works completed through the town long before the end of May.

A meeting of members of the Church of England will be held in the Budd Hall on Tuesday evening, May 7th at 8 p.m. for the discussion of important business. The Rector of Coleman, the Rev. D. T. Watkins-Jones, will preside, and invites both men and women A full attendance is desired.

Thirteen Present

A meeting of those interested in football was held in the council chamber on Monday evening last. There were thirteen present and the reorganization of the Blairmore club proceeded without any complaint being made about the "unlucky" number in attendance. The first business was that of election of officers with the following result: Hon. President, J. Menard; Hon. vice-president, W. Ayers; president, C. Hiscocks; captain, C. B. Bartlett; vice-capt., H. Lambrith. The membership fee was placed at the modest sum of $1.00. The club agreed to join the intermediate league of Southern Alberta and to prepare itself for some interesting games, and to carry off the colors at the end of the season. Blairmore has some excellent material when it comes to playing football, and their actions this season will be noted by a large number of enthusiastic sports.

Editorial Notes

Add vigor to your business by putting an ad. in the local newspaper.

What has recently come to light about Hon. Alfred B. Morine almost makes one believe that Sir James Winter, formerly premier of Newfoundland, was correct when he said that Mr. Morine was the greatest scoundrel that ever entered the narrows of St. John's harbor.

The resignation of President W. B. Powell of District 18, of United Mine Workers' of America, has caused general regret throughout The Pass where he was and still is a great favorite amongst all classes, especially the miners. Mr. Powell's resignation does not brighten the future prospects of this coal mining district.

The United States senate is working after hours in holding enquiries regarding the ill-fated steamship Titanic, but before troubling their heads about matters which directly concern another nation, the "great" Republic to the south of us should start house cleaning at home and unveil some of the mysteries which shroud many of the regretful happenings under their own regime.

Most children enter school between the ages of 6 and 7 years, and the teaching necessary to train some children when they reach that age to adopt school methods is almost beyond human endurance, thus the teacher finds herself discouraged beyond measure. The kindergarten system should be adopted in all our schools if the best results are to be general amongst the boys and girls. The kindergarten acts as a training school for all the higher classes. The fact that there are no kindergartens in connection with our local schools shows that the matter has never been clearly understood by the guardians of the young or if it has been talked about and clearly defined, the absence of such a department from our public schools shows too plainly the parents' lack of interest in the early training of their children and the disregard of the school managers in providing adequate means of learning for the youngsters when their minds are just at the turning and most susceptible point.

Surely all right thinking persons will agree that the property owners at Frank are perfectly justified in seeking compensation from both the Provincial and Dominion governments for the property which many of the Frank people must move away from because of the impending danger. Some of the people who have to move from the danger zone have resided in Frank for many years during which time they have worked hard to build up the home which they are now forced to leave to the mercy of Turtle mountain. The Dominion government has charge of the natural resources of this province and has received a large sum of money in royalty from the chief industry at Frank. The provincial government has received vast sums of money in taxes from the business people and other citizens. It is, therefore, only right that a commission should be appointed by the people of Frank and the governments to decide what the different properties are worth and to arrange the compensation which should, and let us hope will, be paid to the people who have been instructed by the federal government to move away from their property at Frank.

A Coleman Boy Leaves Home at an Early Age

Having apparently found life in a mining camp too quiet and serene and having a longing for prairie life, the little three-year-old son of Peter Sammy wandered from his home at Coleman, on Wednesday morning of this week and started off towards Winnipeg. The little chap followed the teachings of the scripture and took "nothing for his journey, neither staves, nor scrip, neither bread, neither money; neither had he two coats." The young lad turned his back on Coleman and, unlike Lot's wife, he did not look back but kept plodding ahead. He passed through Blairmore about noon but before he had time to reach Frank he was picked up by Constable Bashford, of Bellevue, who took care of the little tired and hungry traveller and, like the good samaritan "he put him upon his beast" and brought him back to Blairmore. After making many enquiries it was learned that the child's parents resided in Little Italy, which is a suburb of Coleman. Mr. and Mrs. Sammy came to Blairmore in the evening and took their venturesome child home.

School Inspector Issues a Gratifying Report

A meeting of the Blairmore school district, No. 68, was held in the secretary's office on Monday afternoon last. All the members were present.

It was moved by H. E. Lyon and seconded by Rev. J F. Hunter that the secretary-treasurer hand over the assessment and collection book to the secretary of the town with the request that he collect all arrears and deposit same in the Union bank. Carried.

Rev. J. F. Hunter moved and H. E. Lyon seconded that the sum of $25.00 be donated by the board towards the up-keep of the school library. This was carried and the additional sum of $12.50 from the government was accepted. New books will be added to this library immediately and the public may continue to have access thereto.

A report from the inspector was read in which it was stated that work of the teachers was of a satisfactory nature and as a consequence of this the pupils were making great educational strides. The inspector thought it advisable to add two more rooms to the present building so as to provide better accommodation for the primary class and to make room for the new scholars that will attend after the summer holidays.

Kenney-Harvey Entertainers

The Kenney-Harvey Entertainers will appear at the Blairmore opera house on Friday evening of this week. They are great fun makers and on Friday evening will have a large programme of comic songs, comic duetts, funny stories, humorous skits, impersonations, vocal, xylophone and violin solos, etc. They come highly recommended and it is hoped that they will be greeted by a large crowd.

Happenings in and Around Bellevue

Mrs. Gill Cousins has moved up from Fernie.

Joseph Elison is up from Monarch for a few days.

George Knowles is building a new house in the rear of his new blacksmith shop.

Mr. Chatfield of Frank is arranging to open a jewelery and repair shop in Bellevue shortly.

Mr. T. A. Sundal, of the Hammer-Sundal Land Co. of Tabor, spent Sunday in Bellevue.

A fast game of football was played between picked teams on the football grounds on Saturday evening.

E. W. Christie will occupy the pulpit in the Methodist church on Sunday evening next. Mr. Irwin will preach at Taber on that day.

The result of the vote on Church Union in Bellevue was a follows: Officials 12 for, against 1, Members 30 for, against 1; Adherents 12 for, against 9.

A large number of Bellevueites spent May Day in Fernie. Bellevue band accompanied the contingent and provided the music for the day at the celebration.

The result of the shooting by the local gun club on Wednesday last was asfollows: Murray 17; Burnett 14; Windsor 7; Lyon 12; Lang 13; Bowers 15; Hinds 18; Cruickshanks 4; Martin 8; Hunter 9; McGowan 11; Walsh 3; Jaeger 5.

The window in front of J. Murray's store was perforated on Monday evening by the overexuberance of someone who had imbibed a little too much to be responsible for his actions. The offender is now in "the coop" awaiting sentence

A game of baseball was played here on Sunday morning between Coleman and Bellevue. Since the game such strong sentiments are being expressed by our citizens against Sunday games, that they are not likely to be popular this summer.

R. Smallwood and sons, Mrs. Brown, W. J. Bartlett and J. D. S. Barrett of Blairmore; Mr. and Mrs. A. I. Blais, of Frank, and Mr. Robertson and Mrs. Lorimer, of Hillcrest, attended the service held in memory of the late William Bauckham, in Bellevue church on Sunday evening.

Bellevue brass band played at the Oddfellows' anniversary parade in Blairmore on Sunday. They are all enthusiastic over the way they were treated by the people of Blairmore and people in Bellevue think it is not such a bad thing to be a bandsman. In fact some of our brave aspirants are purchasing cornets preparatory to some day being bandsmen too.

On Friday last, the West Canadian Collieries Co. disposed of an entire block of business lots on the main street. Among the purchasers are, The Crows' Nest Pass Hardware Co, the Union Bank and Mr. J. W. Gresham of Blairmore. Surveyors are now busy surveying the entire townsite off into lots and these will shortly be put on the market for sale.

We learn with general regret that Mr. J. R. MacDonald is resigning as superintendent of the Bellevue mine. Mr. MacDonald has borne the very grave responsibility of placing the mine in condition after the explosion and also has suffered the unpleasantness of the recent strike. We feel that the present flourishing state of Bellevue is due more to his efforts than to the efforts of any other one man. He has always taken a live interest in sports, in politics, in the band and every movement which he considered to be for the welfare of the inhabitants as a whole, and he will be greatly missed in Bellevue.

A basket social and dance was held in the Socialist hall on Wednesday evening for the benefit of the Bellevue band. A large number of handsomely decorated baskets were auctioned off and brought good prices under the able work of auctioneer Will Chappel. Prizes were awarded as follows: For most original basket, Mrs. J. Raynor; for prettiest basket, Miss Fyfe; for basket bringing the highest price, Miss Ruby Irwin. When the contents of the baskets were demolished dancing was indulged in until the early morning hour

Now is the time to get rid of your rheumatism. You will find Chamberlain's Liniment wonderfully effective. One application will convince you of its merits. Try it. For sale by all dealers.

Happenings in and Around Frank

Rev. Fr. E. J. Legal, Bishop of St. Albert was in Frank on Tuesday.

Mr. and Mrs. G. L. Dunham, of Medicine Hat, spent the week end at the Rocky Mountainsanatorium.

Rev. Fr. L. Doucet, from the Blood Reserue Stand Off, was registered at the Sanatorium on Tuesday.

Mrs. H. H. Fitizsimmons came up from Lethbridge on Friday last and is spending a few days visiting friends in town.

A. V. Lang has just closed one of the largest and most successful store sales that have ever been held in The Pass.

J. J. Tomkins went to Fernie on Wednesday morning to attend the May Day Sports. He returned to Frank again in the evening.

Mrs A. V. Lang and her dauther, Miss Marguerite, came down from Calgary on Thursday last and are spending serveral days in town.

J. M. Howell, a popular druggist of Greensburg, Ky., says, "We use Chamberlain's Cough Remedy in our own household and know it is excellent." For sale by all dealers.

Messrs W. McGowan, J. Whiller and H. Murphy left on Tuesday for Edmonton where they will interview Premier Sifton regarding the removal af buildings from the dangerzone here to a place of safety and also to get if possible same compensation for the property owners.

For soreness of the mucles whether induced by violent exercise or injury, Chambelain's Liniment is excellent. This liniment is also highly esteemed for the relief it affords in cases of rheumatism. Sold by all dealers.

Blairmore School Report

The following is the report of attendance of the Blairmore public school for the month of April, and should be most gratifying to the whole section, as well as to teachers and pupils:

Grade I jr.—Number enrolled 41, average attendance 36.85, percentage of attendance 90, lates 10. Miss Darrach, teacher.

Grade I., sr.—Number enrolled 37, average attendance 35.97, percentage of attendance 97.22, lates 5. Miss Cogland, teacher.

Grades II. and III.—Number enrolled 42, average attendance 38.43, percentage of attendance 91.5, lates 9. Mrs. Page, teacher.

Grades IV. and V.—Number enrolled 31, average attendance 28.5, percentage of attendance 91.93, lates 7. Miss Fulton, teacher.

Grades VI., VII. VIII.—Number enrolled 16, average attendance 14.92, percentage of attendance 93.19, lates 0. Miss O'Brien, teacher,

M. R. O'BRIEN, Principal

Stringent Laws in Force For Fishing in Province

The following are the late laws governing fishing in Alberta waters passed at the last sitting of the provincial assembly:

Angling or trolling in waters frequented by trout, grayling or Rocky Mountain whitefish is prohibited, except under permit.

Every British subject resident in the province for which it is issued shall be eligible for an angling and trolling permit. The annual fee for such permit shall be one dollar.

Every non-resident shall be eligible for an angling and trolling permit the fee on which shall be one dollar for a single day, or five dollars for the season.

Anyone taking out an angling and trolling permit shall be provided with a tag bearing the number and date of such permit, and the signature of the Fishery Officer issuing it, which tag shall be attached to the rod or troll when in use.

In waters not frequented by trout, grayling or Rocky Mountain whitefish, angling or trolling may be carried on by British subjects without a permit.

In waters in that portion of Alberta northward from the international boundary line to and including the Bow river and its tributaries, no one shall fish for, catch or kill any trout, grayling or Rocky Mountain whitefish from the 1st day of November in each year to the 30th day of June following, both days inclusive.

In the Red Deer river and its tributaries, and the North Saskatchewan river and its tributaries, no one shall fish for, catch or kill any trout, grayling or Rocky Mountain whitefish from the first day of September in each year to the 30th day of April following, both days inclusive.

In the Athabaska river and its tributaries, no one shall fish for, catch or kill, any trout, grayling or Rocky Mountain whitefish from the first day of November in each year till the 31st day of May following, both days inclusive.

In waters frequented by lake trout, and in which no netting is allowed, no one shall fish for, catch or kill any trout from the first day of September in each year till the 30th day of April following, both days inclusive.

No cut throat trout, rainbow trout, grayling or Rocky Mountain whitefish less than nine inches in length shall be retained or kept out of water, and anyone who takes or catches such fish of less than the minimum measurement named—which measurement shall be from the point of the nose to the center of the tail—shall return such fish to the water from which it is taken alive and uninjured.

No lake trout less than fifteen inches in length shall be retained or kept out of the water, and anyone who takes or catches such fish of less than the minimum measurement named—which measurement shall be from the point of the nose to the center of the tail—shall return such fish to the water from which it was taken alive and uninjured.

No one shall, in one day, catch and retain more than twenty-five cut throat trout, rainbow trout or Rocky Mountain whitefish, or of the different species named than will in the aggregate amount to more than twenty-five fish.

No one shall catch and retain more than ten lake trout in one day.

No one shall, in one day, by angling or trolling, catch and retain more than twenty-five pike (jackfish), pickerel (dore), or of either of these species than will, in the aggregate amount to more than twenty-five,

THE LIQUOR LICENSE ORDINANCE

APPLICATIONS FOR LIQUOR LICENSES

The following application for a liquor license will be considered by the Board of Licence Commissioners, at a meeting to be held in the License Branch Offices, Calgary, on Thursday the 23rd day of May, 1912, at 10 o'clock A. M.:

Donald Alexander Sinclair and William Stanley Fairfield for a new hotel license in respect to the Fairmont Hotel, situate on lots 21, 22 and 23, in Block 18, Plan 7242 A-1, Maple Leaf, (to be erected according to plans and specifications filed in the Department of the Attorney General).

Dated at Edmonton this 29th day of May, 1912.

L. F. CLARRY
Deputy Attorney General

LOTS!
The North-West Quarter
of Section 9
Adjoining the Town of Coleman
Will be Subdivided at once into Lots and Placed on the Market

Lots 50 by 100 feet will be sold at from $125 to $200, Terms easy and suitable to Purchaser.

Acre Lots will be sold for $300 and parcels containing Five or Ten Acres will be sold on easy terms.

THOSE APPLYING FIRST WILL GET THEIR CHOICE WHEN SURVEY IS COMPLETED

This Quarter Section has been purchased from the Calgary and Edmonton Land Co. by

Joseph Grafton
J. H. Farmer

Lake-City

Is the name of the Western Terminal Point of the proposed Crow's Nest Pass Electric Railway and is already tapped by the Pass line of the C. P. R., while the G. N. R. has already approached to within a few score of miles and must eventually pass through this admirably located town.

Lake City

Is located by the shore of Crow's Nest Lake, only a few miles east of the provincial boundary between Alberta and British Columbia, and just north of the international line. In reality, it is at the top of Canada where the majestic Rockies tower in serene magnificance over great chasms and numerous fiords, reflecting their presence on the waters of this beautiful lake. Here also are afforded the very best tasks for the daring mountain climber and for huntsman who desires to outrival the quiet ways of the Rocky Mountain goat, sheep, deer or elk, which are the monarchy thereon. In close proximity are numerous timber, mineral and fuel resources, development of which is now in its initial stages. These resources include gold quartz, coal, iron and pulp wood. Crow's Nest Lake has long been looked upon with promise as an admirable location for health and tourist resorts, and but now this promise is being realized. Plans for hotels, etc. are being arranged, as well at boat houses, and the most modern pleasure yawls will soon glide over the surface of this beautiful lake.

But a few weeks ago lots were placed on the market, and the agents have had their hands full attending to purchasers. Prices run from $150 up. For further particulars apply to the agents:

AN OPPORTUNITY FOR DISTRICTS

Chairman McNichol of Dry-Farming Congress Exposition Makes Statement.

Mr. J. W. McNicol, chairman of the Dry-FFarming Products Exposition, in an address before the Alberta Fairs' association at Calgary, speaking of "The International Dry-Farming Congress and Exposition and the Opportunity it presents to the Agricultural Societies of the Province," said:

"For the past three or four years the Southern end of the Province, as represented by Cardston, Macleod, Taber and Lethbridge, has been giving special attention to the International Dry-farming Congress and Exposition. We have attended the Congress at Cheyenne, Billings, Spokane and Colorado Springs and have had the backing of the government exhibit at the last two places named. The government exhibit has won the grand sweepstakes for the best state or provincial exhibit at Spokane and at Colorado Springs, and our farmers have won a very large proportion of the premiums offered for small grains, grasses and vegetables.

"At Colorado Springs last fall Alberta took almost everything that was not nailed down and secured the Congress and Exposition for 1912 and it will be held at Lethbridge October 21 to 26 next. We believe that in securing this Congress and Exposition for Alberta for 1912, we have done a work which will be of vast and far reaching benefit to the province and to the whole of Western Canada.

"We are aware that in some parts of the Province the name dry-farming is looked upon as offensive, and that with no real knowledge of the objects of the Congress, and knowing nothing about it except that its name includes the word "dry", some people are antagonistic to it.

"Dry-farming is the science of agriculture as applied to farm operations in regions of limited or uncertain rainfall.

HON. DUNCAN MARSHALL

Minister of Agriculture of Alberta and Vice-President of the International Dry-Farming Congress.

"Dry-farming is better farming and is a profitable system for every farmer upon every farm in every district of the world.

"Dry-farming is not farming without moisture, but is the method by which the natural rainfall is conserved in the soil; soils are enriched and drought resistant plants are developed with the object of saving the moisture. Dry-farming practice develops the best farmers on earth.

"The Congress is a popular, scientific society of farmers, and it is worth hundreds of dollars a year to any farmer to participate actively in its work.

"The adoption of its precepts and teachings will enable any farmer in Western Canada to raise a better and bigger crop than he is now doing.

"This Congress and Exposition is turning the eyes of the entire agricultural world upon this province, and there is no question but that the biggest farming congress that has ever been held, will take place in Lethbridge, October 21 to 26, and we believe that the Exposition which will be held in connection with it will be the best exhibit of agricultural products and agricultural machinery that has ever been held in Canada.

"Every effort is being made to enable the whole province to participate in the benefits that are expected to accrue from this congress and exposition, and one of the methods whereby we expect each district to benefit is in taking part in the exposition. In this exposition it is expected that every agricultural society representing every district in Alberta will have a high class district exhibit, thereby advertising to the great number of American and Eastern Canadian farmers who will be present, the agricultural resources of that district

"The Alberta Department of Agriculture is offering some fine premiums for the best district exhibit In addition to district exhibit there will also be premiums for the best individual farmer's exhibit. Some of the biggest premiums ever offered are now being arranged for, and will be announced in the premium list. These exhibits will be products of the soil only, and must be grown on land which receives no artificial moisture from irrigation and must have been grown in the season of 1912.

"You note that the date of this Exposition is late, the third week in October, coming after all the local agricultural society expositions, and every society should see to it that it is represented by an exhibit, much of which can be gathered by holding the premium winning exhibits at their own exposition.

"In order to make a successful up-to-date exhibit, it is necessary to begin preparations now. Seeds of high grade in the various varieties should be purchased, carefully planted and attended to, especially for exhibition purposes. The number of varieties of the different grain and grasses shown, will have a large bearing on winning premiums, in fact, next to quality this will be the largest score

"At Lethbridge there will be no charge for space for these exhibits, and all exhibitors will be treated alike.

"The question of obtaining a part of the benefit that the International Dry-Farming Congress and Exposition will bring to Alberta for your own district, lies entirely in your own hands. The opportunity is before you. Get your exhibit ready. Begin to plan for it now, and be present at the Dry-Farming Congress with a district exhibit, which will fully represent the magnificent district from from which you each come.

"I will be pleased to answer any enquiries regarding space or anything else, and trust that each and every society will be represented at the Exposition. Write to W. J. McNicol, chairman Exposition Committee, Dry-Farming Congress, Lethbride, Alberta."

SCOTT'S EMULSION

is the best and quickest way to perfect health. Women and girls who suffer are simply weak—weak all over.

Opiates and alcoholic mixtures are worse than worthless, they aggravate the trouble and lower the standard of health.

Scott's Emulsion

strengthens the whole body, invigorates and builds up.

Be sure to get SCOTT'S—it's the Standard and always the best.

A TURKISH BATH ON THE FARM

FOLKS ON THE FARM—Are you missing one of SNAP'S best services? A dip in the tub and SNAP used instead of soap makes you feel as if you had enjoyed a genuine TURKISH BATH.

It is thoroughly cleansing, removes the stain and grime of hard work, refreshes and invigorates as it cleans, and is soothing to the skin.

Be sure you get SNAP the original Antiseptic Cleaner. 113

BABY'S OWN TABLETS CURE CONSTIPATION

No ailment causes more suffering to little ones than does constipation. Hardly a little one escapes this trouble—many of them suffer from it continually. The surest cure and safest remedy—one that is absolutely guaranteed to be free from harmful drugs—is Baby's Own Tablets. They never fail—they have cured thousands of cases. Concerning them Mrs. Lev. Blanchet, St. Racine, Que., writes: "I have used Baby's Own Tablets for constipation and vomiting and have found them an excellent remedy, and I have recommended them to several of my neighbors." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Prices are Still Soaring.

The Department of Labour's wholesale prices record up to date shows a still higher level for February than for January, notwithstanding that the latter month was reported as having seen the highest prices since 1882-4 and possibly since 1873. The index number rose during February from 131.4 to 134.3, these being percentages of the average level of prices during the last decade of the last century. The upward movement was largely the result of advances in grains, animals and meats, dairy products and potatoes. Retail prices were also upward, especially in the food products derived from the lines above mentioned.

That was kind of clever of Johnnie—in turning the tables on the teacher—as told in the Delineator:—"What dirty hands you have, Johnnie!" said his teacher. "What would you say if I came to school that way?" "I wouldn't say nothin'," replied Johnnie. "I'd be too polite."

In Chapell, Essex, which has a population of under 400 inhabitants, there are eighteen old age pensioners, whose combined years total 1,417.

Miss Foy—Oh, how I wish I had Helen's charm.

Miss King—What charm has she?

Miss Foy—She can cry in the sweetest soprano voice.

The nearest neighbor of New Zealand is Australia, which is twelve hundred miles distant.

The earliest known marriage contract in Greek dates from 312 B.C.

COULD NOT WALK FROM RHEUMATISM

GIN PILLS STOPPED THE PAIN

55 University St., Montreal

"Just a word of praise for GIN PILLS. About fifteen months ago, I could not walk across my room, suffering severely with Rheumatism. I took GIN PILLS and became quite well. Two months ago, I had Rheumatic Pains with Neuralgia and Diarrhoea. I resorted to Gin Pills again for one week and became quite well."

SAMUEL LONGMORE.

Here is our straight guarantee, given with every box of GIN PILLS. We know that Gin Pills will positively cure Rheumatism, Sciatica and Lumbago—as well as Pain in the Back, Irritated Bladder and weak, strained Kidneys. We pledge ourselves—the largest wholesale drug house in the British Empire—to promptly return your money should Gin Pills fail to give satisfaction. 50c. a box, 6 for $2.50. Sample free if you write National Drug & Chemical Co. of Canada, Limited, Dept. N.U., Toronto. 90

The Henpecked Husband: "Is my wife going out, Elsie?"

Elsie: "Yes, sir."

Henpecked Husband: "Do you know if I am going with her"

As a safe-guard buy nothing in the baking powder line unless all the ingredients are printed on the label. The manufacturers of the brands of baking powder in which large quantities of alum are used, are afraid to print the ingredients on the label as no person would buy it at any price. Magic Baking Powder is pure and guaranteed not to contain alum.

The Morse Code For Aeroplanes.

An idea which is being worked out at the present time is the adoption of the Morse Code for the use of airmen. It consists in smudges of lampblack ejected by compressed air from a funnel-shaped tube attached to the forward edge of the upper plane of a bi-plane. The apparatus is under the control of the airmen, who, having familiarized himself with the Morse Code, indicates dashes with a long puff of smoke and dots with a shorter ejectment. Lieutenant Roy C. Kirkland is responsible for the idea, and the preliminary experiments have proved immensely successful, the signals being easily read off by observers on terra firma.

Won Fame on its Merits.—The unbounded popularity that Dr. Thomas' Eclectric Oil enjoys is not attributable to any elaborate advertising, for it has not been so advertised, but is entirely due to the merits of this Oil as a medicine. In every city, town and hamlet in the country it is sought after solely because of its good qualities.

A Hint.—Lady: I guess you're gettin' a good thing out o' tending the rich Smith boy, ain't ye, doctor?—Doctor: Well, yes; I get a pretty good fee. Why?—Lady: Well, I hope you won't forget that my Willie threw the brick that hit 'im!—Scribner's.

Shiloh's Cure

quickly stops coughs, cures colds, heals the throat and lunds - - 25 cents.

Only Guide Posts.

A well known Fourth avenue banker was sitting in a downtown restaurant eating mush and milk.

"What's the matter?" inquired a friend.

"Got dyspepsia."

"Don't you enjoy your meals?"

"Enjoy my meals?" snorted the indignant dyspeptic. "My meals are merely guide posts to take medicine before or after."—Pittsburgh Post.

Oranges were purchased last year by the United Kingdom to the value of $11,600,000, and lemons to the value of $2,320,000.

Play 2,600 Years Old.

Appropriately enough, following the return of the King and Queen, there was an Indian performance at the Royal Court Theatre recently. On that occasion there was presented the famous mystery play of India, "Buddha, the Light of Asia; His Life and Great Denunciation.' It was a perfect Indian representation, for there was nearly a score of Indians in the cast. This famous play is 2,600 years old.

The transition from winter's cold to summer's heat frequently puts a strain upon the system that produces internal complications, always painful and often serious. A common form of disorder is dysentery, to which many are prone in the spring and summer. The very best medicine to use in subduing this painful ailment is Dr. J. D. Kellogg's Dysentery Cordial. It is a standard remedy, sold everywhere.

The New and the Old.

Governor Foss of Massachusetts tells of a well known divine who was visiting a state prison, when he came across a prisoner whose features were familiar to him. "What brought you here, my poor fellow?" he asked.

"You married me to a woman a little while ago, sir," the prisoner replied with a sigh.

"Ah, I see," said the parson; "and she was domineering and extravagant, and she drove you to desperate courses eh?"

"No," said the prisoner, "my old woman turned up."

Lady—Couldn't you possibly have saved your friend who was captured by the cannibals?

African Traveller—Unfortunately not. When I arrived he was already scratched off the menu.

French investments of capital abroad amount to $8,000,000,000 of which $2,500,000,000 is invested in Russia.

CANADA'S MACE.

Gorgeous Golden Bauble Is the Insignia of Authority.

A bauble, Cromwell called the mace. To-day we think of a bauble as something smaller — something we can hang on your watch chain, or carry to a pawn shop in your pocket. Well, you cannot do that with our mace; not even Col. Smith can do it, and he is a strong man and knows more about the mace than any other person in the land.

Our mace is about as long as a stick of cord wood cut for city consumption. It is a little taller than a barrel of flour, but not quite so tall as a schoolboy who wears long trousers. Its weight is considerable. You might lift it with one hand but you would not try to swing it to your shoulder without the aid of two. In fact, to handle the mace is no child's play.

All other things being equal—pay included—a man could spend a more comfortable day swinging an axe in the forest than in looking after the mace on one of those fussy days, when the House of Commons cannot make up its mind whether it wishes to sit as a House with the Speaker in the chair, or as a Committee of the Whole with the Deputy presiding. Back and forth it goes from one to the other, and Col. Smith is kept busy with a sort of Indian club exercise removing the mace from the table and hanging it on the hooks down at the end and then taking it from the hooks and restoring it to the table. On such a day as that Col. Smith is the busiest man in Ottawa, and when all is over, sometimes about midnight, he has nothing to show for his labor except a wilted collar and a few sparkling bits of gold-dust ground into the palms of his white gloves from handling the great golden bauble.

Golden it is from top to bottom, but how far through no man knows except the Sergeant-at-Arms. Gold through and through he evidently believes it to be, judging from the care he takes of it. It certainly looks like solid gold, and it lifts like it, although one has to admit that one's experience in lifting huge chunks of pure gold is rather limited.

Like almost everything else that shares this world with man, "that pendulum betwixt a smile and a tear," the mace has known troubles, has confronted danger, and has suffered loss. Some seventy years ago all that there was of Canada were the two old Provinces—Upper and Lower Canada—whose Legislature consisted of a House of Assembly and a Legislative Council. The mace in use in our House of Commons is the one that was used in that old House of Assembly of United Canada.

For a number of years Toronto and Quebec were alternately the seat of Government. The mace became a wanderer, but finally a permanent resting place was found, when, in 1865, the present Houses of Parliament were completed in Ottawa. Then the mace, when the House was not sitting, was snugly tucked away in a stout little cabinet prepared for it in the Speaker's apartments, or tenderly deposited on a green velvet cushion at the lower end of the Clerk's table when the Speaker is in the chair, or deposited on two velvet-covered hooks that project from the legs of the table at about a foot below the level of the top.

There has been a mace for more than half a century. Around it has grown up the city of Ottawa, changed by the presence of the golden "bauble" from little, sawmill settlement of Bytown into the national capital of our great Dominion.

Around the mace has been built up all our federal statutory law, which bound in buff half-calf, looks so pretty on a library shelf, and around it has been debated every policy that during all these years has tended to make or mar the fortunes of our country. The mace has seen and heard more politics than any living member of Parliament.

What does it think of it all? No man knows, except possibly Col. Henry Smith, Sergeant-at-Arms, the mace's special guardian and most intimate friend—and discreet man that he is, he will not tell.

Preacher Wins a Wager.

"The sporting parson" is the name that all Toronto gives Rev. J. D. Morrow, the athletic pastor of Dale Presbyterian Church, and on a Toronto street car the other day Mr. Morrow gave a very good demonstration of why he holds the title. Once upon a time the preacher held the Canadian amateur 100 yards dash record, and this fact is well known.

On the street car the other day Mr. Morrow was accosted by a man who evidently had scant faith in the preacher's fleetness of foot. In plain words he spoke his doubt. Mr. Morrow is always game, and he asserted that he was still able to run a bit.

"Tut!" said the man. "I can beat you myself. I'll bet you $2 for your new church funds that I can beat you in 100 yards."

Now, it happens that the preacher is having a hard time raising the money to put a roof on his church, and that two spot looked good to him.

"Done," said he. "Get off the car and we'll run it now."

At the next stop they alighted, ran the 100 yards, and Mr. Morrow made it a walkaway.

The $2 is now in the church building fund—a wager made and won to the glory of the Lord, as Mr. Morrow puts it.

A Puzzle For the Expert.

A case concerning motor driving was on hand, says The Montreal Star, when the chauffeur declared that when driving at forty miles an hour he could, if necessary, pull up in ten or twelve feet.

"Um!" said the judge.

An expert was the next occupant of the box.

Said his lordship, "If a motorcar were traveling at forty miles an hour and the brakes could be put on in such a manner as to stop it within ten or twelve feet, where would the driver go?"

"Depends very much on the sort of life he'd been living," said the expert.

BRUCE'S SEEDS

The Standard of Quality Since 1850

An experience of over sixty years in the Seed business in Canada, and our **long connection** with the **Best Growers of the World**, gives us advantages which few seed houses possess; added to this, our **careful system of testing** all our seeds for purity and germination, and the great care exercised in every detail of our business, brings to us every season many pleased customers, to add to our already large list of patrons.

SHOPPING BY MAIL is a most fascinating, enjoyable, and profitable pursuit. You can in a few days, and with perfect safety, though far removed from the source of supply, have delivered at your door—

Bruce's Seeds: The Seeds that satisfy.

All you require to do is to send us a post card asking for our **handsomely illustrated 112 page Catalogue of Seeds, Plants, Bulbs, Implements and Poultry Supplies**, which we will mail **free of charge**, and on receipt of same send us your order. **Write for it now to**

HE SAID—"Few of us realize how much salt we eat. The fact that we put salt on all meats and vegetables—in bread, cake and pastry—soups and sauces—butter and cheese—shows the importance of using an absolutely pure salt."

SHE SAID—"Well, we are using WINDSOR SALT and no one could make me believe there was any better salt in the whole world than my old standby 52

WINDSOR TABLE SALT

Dickens Day.

From a Michigan paper: "The day was devoted to the study of Dickens, Mrs. Ballard reading the story of 'The Clansman,' by Dickens, which was much enjoyed."

In a moving picture theatre entrance: "Big Shakespeare feature. First reel—The early life of 'David Copperfield.' Second reel — 'Little Em'ly' and 'David Copperfield.' Third reel—The love of 'David Copperfield.' Enough said."—Boston Transcript.

Nuptial love maketh mankind, friendly, love perfecteth it, but wanton love corrupteth and embaseth it.

It's pretty hard to keep an overripe promise.

Where New Stars Come From.

An astronomer tells us how new stars come about. Suns fall towards each other and get up speed for hundreds of years, and then there is a nasty jar. Heat is generated by the collision, and a new star is born. Professor Bickerton believes that the appearance of Nova Persei, which is 10,000 times as brilliant as the sun, is to be explained in this way.

Some relaxation is necessary to people of every degree; the head that thinks, and the hand that labors, must have some little time to recruit their powers.

Dr Clark's Sweet Nitre PILLS FOR THE KIDNEYS
THE MARTIN, BOLE & WYNNE CO.

SWEET NITRE PILLS for the KIDNEYS
Cure and Relieve Backache, Catarrh of the Bladder, all Weaknesses, of the Kidneys and Bladder.

Telephoning From England to Switzerland.

The completion of a new submarine cable between England and France has resulted in the successful telephonic transmission of messages between Great Britain and Switzerland. Satisfactory commercial conversations are now carried on between England and Genova, via Paris and Lyons, and with Basel, via Paris and Belfort.

"Does your fiancee know your age, Lotta?"

"Well—partly."

Cotton can only be grown in tropical or semi-tropical countries; but wool is mainly a product of temperate regions.

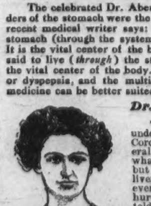
The Union of South Africa has a total area of 470,000 square miles, with a population approaching 6,000,000.

Ninety-nine miles is the total length of the Suez Canal, and the width is just over 121ft.

NO ONE STRONGER THAN HIS STOMACH.

The celebrated Dr. Abernethy of London was firmly of the opinion that disorders of the stomach were the most prolific source of human ailments in general. A recent medical writer says: "every feeling, emotion and affection reports at the stomach (through the system of nerves) and the stomach is affected accordingly. It is the vital center of the body * * * * ." He continues, "so we may be said to live (*through*) the stomach." He goes on to show that the stomach is the vital center of the body. For weak stomachs and the consequent indigestion or dyspepsia, and the multitude of various diseases which result therefrom, no medicine can be better suited as a curative agent than

Dr. Pierce's Golden Medical Discovery.



MRS. MURKEN.

"Several months ago I suffered from a severe pain right under the breast-bone," writes MRS. G. M. MURKEN, of Corona, Calif. "Had suffered from it, off and on, for several years. I also suffered from heart-burn, did not know what was the matter with me. I tried several medicines but they did me no good. Finally, I was told it was my liver. I did not dare to eat as it made me worse. Whenever I swallowed anything it seemed that I would faint—it hurt so. I grew very thin and weak from not eating. Was told to take Dr. Pierce's Golden Medical Discovery. I took five bottles of it, and could feel myself getting better from the first dose. I could eat a little without pain and grew strong fast. To-day I am strong and well and can do a big day's work with ease. Can eat everything and have put on flesh wonderfully. I will say to all sufferers write to Dr. Pierce. He has my undying gratitude."

ROYAL YEAST

REFUSE SUBSTITUTES

Announcing the Engagement

"Miss Upperton, are you engaged to be married to Count Nocash?"

"There is absolutely no truth in the rumor. Marie, show the gentleman the ring and give him a photograph."

Shiloh's Cure

quickly stops coughs, cures colds, heals the throat and lungs - - 25 cents.

The population of Russia on January 1, 1910, was 160,748,400, an increase in about 13 years of 33,190,000. And this "in spite of war, cholera and famine."

Minard's Liniment Relives Neuralgia.

Illiteracy.

The term "illiterate" includes all persons at least 10 years of age unable to write their own language, a majority of them being also unable to read. In the United States, including aliens, negroes, Indians and Mongolians, 106 in every 1,000 of population 10 years of age or over are illiterate. The last reports on illiteracy are not in, but according to the last 46 of every 1,000 of our white native born over the age of 10 could not read or write. The great majority of such illiterates are found along the Appalachian mountain range and in the remote piney woods of some of our Southern States, where the distance and the scarcity of the population make Public schools well nigh impossible.—Christian Herald Almanac.

The ancient Greeks would grant a man a divorce, but their laws would not permit him to marry a younger woman than the divorced wife. They were not so slow.—Courier-Journal.

Why Should I Use Cuticura Soap?

"There is nothing the matter with my skin, and I thought Cuticura Soap was only for skin troubles." True, it *is* for skin troubles, but its great mission is to *prevent* skin troubles. For more than a generation its delicate emollient and prophylactic properties have rendered it the standard for this purpose, while its extreme purity and refreshing fragrance give to it all the advantages of the best of toilet soaps. It is also invaluable in keeping the hands soft and white, the hair live and glossy, and the scalp free from dandruff and irritation.

While its first cost is a few cents more than that of ordinary toilet soaps, it is prepared with such care and of such materials, that it wears to a wafer, often outlasting several cakes of other soap, and making its use, in practice, most economical. Cuticura Soap is sold by druggists and dealers everywhere, but the truth of these claims may be demonstrated without cost by sending to "Cuticura," Dept. 7M, Boston, U. S. A., for a liberal sample cake, together with a thirty-two page book on the skin and hair.

Well, Well!

Hawkshaw, N.B., Sept. 1st, 1905.

Too Late.

Richard Harding Davis, at a luncheon in New York, illustrated with a story a literary critic's ignorance.

"He is as ignorant of letters," he said, "as Aunt Tabitha was of betting.

"A young New Yorker took his bucolic Aunt Tabitha to the races. At the end of the first race he said:

"'I think, aunt, I'll put a V on Podasokus at 10 to 1.'

"'Oh, but you're too late, nephew,' said Aunt Tabitha, glancing at her old-fashioned watch. 'It's 10 to 2 now.'"—Los Angeles Times.

TO CURE A COLD IN ONE DAY

Take LAXATIVE BROMO Quinine Tablets. Druggists refund money if it fails to cure. E. W. GROVE'S signature is on each box. 25c.

It Often Happens.

"I guess I got a little too gay," admitted the landlord. "I wouldn't paint a doorstep for the old tenant."

"And he moved?"

"He moved; and now I've got to paint the entire house before I can get a new tenant."—Louisville Courier-Journal.

"I hope you liked the pie, Henry?" ventured a young wife, casting an anxious glance at her husband soon after dinner. I bestowed great pains on the crust." "I thought you did, my dear," he said; "for I've got the pains now!"

England imported from continental countries last year nineteen million "great hundreds" (120) of eggs, of which Russia supplied 52 per cent. and the average price of which was 43⅛ per cent. above that of thirteen years ago.

The federal government owns 55 bird reservations in different parts of the United States.

City Editor—Hi, Sims!

Sims (the reporter)—Yes, sir.

City Editor—Go down to the hotel and interview the magnate and get his denial of the interview in the same. Scoot now!—Judge.

Weighed the Argument.

When Charles A. Dana was at the head of the New York Sun, a young graduate of Cornell was assigned to the reviewing of books. One of the first handed him was a massive volume purporting to be a life of Napoleon, written by a college professor.

The young reviewer had, as it happened, specialized on the life of Napoleon under a great authority at his university and he thought but little of the effort that was submitted to him by his editorial chief. He glanced over the illustrations, laid the book aside, and turned in this comment:—

"Life of Napoleon, by Prof. So-and-So. This book weighs nine pounds."

Mr. Dana read the review and sent for the Cornell man.

"Did you write this review?" he growled.

"Yes, sir."

"Did you read the book?" growled Mr. Dana, with a fiercer look than before.

"No, sir. I weighed it."

"That will do," growled the chief.

Then he sent word downstairs to the cashier to raise the young man's salary.

The wages earned last year by Spanish settlers in South America amounted to 110,000,000 pesetas, or about $25,000,000, according to a statement by the Chilean Consul in London.

Sweet and palatable, Mother Grave's Worm Exterminator is acceptable to children, and it does its work surely and promptly.

Getting the News.

The young girl sat in her bedroom with a novel. Her hair was down and her feet were in red slippers. Now and then, extending her white arms, she yawned.

You see, it was very late, and downstairs in the parlor her older sister was entertaining a young man. She naturally felt a deep interest in the entertainment. She was waiting to hear how it would terminate.

And at last there was a sound in the hall, a crash as of a closing door, and it was plain to the impatient girl that the young man had gone.

She threw down her novel and, running forth, peered over the balustrade down into the hall's intense blackness.

"Well, Maude," she said, "did you land him?"

There was no immediate reply to her question. There was a silence, a peculiar silence, a silence with a certain strained quality in it. Then a masculine voice replied:—

"She did."

In 1909 the telegraph and telephone companies, together with similar concerns that use electric wires in this country, expended over $7,000,000 in the purchase of poles.

The wind-bags who try to convince you that you've lost your nerve have got theirs with them; only it's of a [illegible]ferent kind.

Landed

There was a bachelor who had courted a young lady for a long time without coming to the point, and one evening in leap year, the young lady being very musical, he took her to a concert.

The orchestra played No. 6, a selection that seemed to the bachelor very beautiful. He bent over his companion and whispered.

"How lovely that is! What is it, do you know?"

"It is the 'Maiden's Prayer.'"

And at the same time she handed him her programme, pointing to No. 6 with her finger.

He read and started, for the real name of the selection was "Mendelssohn's Wedding March." The bachelor bought the ring next day.

There are 3,000 canary bird breeders in Norwich, England.

WOMEN MAY AVOID OPERATIONS

By taking Lydia E. Pinkham's Vegetable Compound

The following letter from Mrs. Orville Rock will prove how unwise it is for women to submit to the dangers of a surgical operation when it may be avoided by taking Lydia E. Pinkham's Vegetable Compound. **She was four weeks in the hospital and came home suffering worse than before.**

Here is her own statement.

Paw Paw, Mich.—"Two years ago I suffered very severely with a displacement. I could not be on my feet for a long time. My physician treated me for seven months without much relief and at last sent me to Ann Arbor for an operation. I was there four weeks and came home suffering worse than before. My mother advised me to try Lydia E. Pinkham's Vegetable Compound, and I did. Today I am well and strong and do all my own housework. I owe my health to Lydia E. Pinkham's Vegetable Compound and advise my friends who are afflicted with any female complaint to try it."—Mrs. ORVILLE ROCK, R. R. No. 5, Paw Paw, Michigan.

If you are ill do not drag along until an operation is necessary, but at once take Lydia E. Pinkham's Vegetable Compound.

For thirty years it has been the standard remedy for women's ills, and has positively restored the health of thousands of women. Why don't you try it?

MARCH WEATHER RHEUMATIC WEATHER

Victims Can Cure Themselves With Dr. Williams' Pink Pills.

With the coming of March people who are afflicted with rheumatism begin to have unpleasant reminders of their trouble. The weather is changeable—balmy and springlike one day, raw, cold and piercing the next. It is such sudden changes of weather that sets the pangs and tortures of rheumatism, lumbago, and sciatica going. But it must be borne in mind that although weather conditions start the pains, the trouble is deeply rooted in the blood and can only be cured through the blood. All the lotions and liniments in the world can't cure rheumatism. Rubbing may seem to ease the pain while you are rubbing, but there its value ends. Only through the blood can you cure rheumatism. That's why Dr. Williams' Pink Pills have so many thousands of cures of this trouble to their credit. The new, rich blood which they actually make drives out the poisonous acid, and rheumatism is vanquished. Here is an example. Mr. W. C. Douglas, Webbwood, Ont., says: "I was attacked with inflammatory rheumatism, which spread through my entire system. For two months I was not able to go about, and seemed to be hovering between life and death. My joints were swollen and my legs and arms twisted, until I expected that they would never return to their normal shape. The doctor seemed to help me, but not to cure me, and I would be better one day and worse the next. At this time a friend strongly urged me to try Dr. Williams' Pink Pills and I got a dozen boxes. Soon after beginning the pills there was a change for the better, and I continued using the pills until I was quite well again. The swelling disappeared from the joints. My limbs returned to the natural shape and I feel as if Dr. Williams' Pink Pills have saved me from being a rheumatic cripple. I hope my experience may prove a blessing to some other sufferer."

If you suffer from rheumatism, or any other disease of the blood, begin to cure yourself to-day with Dr. Williams' Pink Pills. Sold by all medicine dealers or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

The Man of 45.

"Among the men I hire, nine out of ten are better workers at 45 years of age than are men of 25 or 30," declared the secretary and manager of a Chicago commercial house. This executive believes that the man of 45 or thereabouts is in the prime of life, physically and mentally. Men of mature years are more reliable, he avers, more trustworthy, and are not apt to be possessed of that restlessness and indecision which so often characterizes youth, and which leads younger men continually from one position to another. The average young man in business, he holds, is always seeking a "soft snap" job, and is not content with sticking it out with an employer through thick and thin until his services become highly valuable and perhaps indispensable.—Business Magazine.

WOMEN IN ALL PARTS OF CANADA

TELL OF THE HEALTH DODD'S KIDNEY PILLS BRING

They Made a New Woman of Mrs. Elie Amirault Who Was a Victim of Kidney Disease for Over a Year.

Amirault's Hill, Yarmouth Co., N.S. —(Special.) "Four boxes of Dodd's Kidney Pills made a new woman of me." Those are the words of Mrs. Elie Amirault of this place. They are words that have been used again and again by women in all parts of Canada who have suffered, and who have found relief and cure in Dodd's Kidney Pills.

"I suffered for over a year from kidney disease," Mrs. Amirault continues. "Nothing I tried helped me. At last some one told me to try Dodd's Kidney Pills. Before I had finished the first box I felt better. Four boxes made a new woman of me."

No remedy ever given to the public has brought health and happiness into the lives of so many women as Dodd's Kidney Pills. This is because nine-tenths of the ills to which women are subject come from diseased kidneys. No woman who uses Didd's Kidney Pills can have diseased kidneys. They always cure the kidneys.

The Overdraft

"To continually sow and reap without replacing anything in the soil, is much like a man having a bank account at the beginning of his career, but who continually draws cheques against his account without thinking to make a deposit. The only result is an overdraft—a sterile soil."—Gen. Louis Botha, Premier of the South African Union.

The ties used on the Panama railroad are made of such hard wood that holes have to be bored for the spikes and a special form of screw spike used.

Dreaming.

"There would be fewer divorces," said "Big Tim" Sullivan, at a banquet in New York, "if men treated their wives with absolute equality. There are too many husbands of Cholmondeley's stamp.

"As Cholmondeley blew the froth from a large glass of beer one evening, a friend said to him:—

"'I hear you've had your pay raised, Cholmondeley.'

"'Yes, but it did me no good,' and Cholmondeley drained his glass and pushed it to the bartender for refilling.

"'Did you no good? Why not?'

"'I talked in my sleep,' Cholomondeley replied, 'and my wife got on to it.'"

THE EQUITY FIRE INSURANCE COMPANY OF CANADA

Annual Meeting Held at Head Office, 24 King St. West, Toronto, February 21st, 1912.

In connection with the Annual Report it may be stated that there was a decrease in fire losses of $55,100.34 as compared with the previous year; the losses paid by the organization since its formation, $1,091,848.90; it wrote last year 22,450 policies, and since organization 184,050; Security to Policy Holders $408,262.63 an increase of more than $30,000 over last year's security. Considerable addition to the stock was made, and the sale of an additional 10,000 shares is authorized at a premium of 20 per cent. The Company is represented in every place of importance throughout Canada.

Mercury.

Why does quicksilver run away when we touch it?

Quicksilver is not silver, but it has a silvery appearance. The strict chemical name for it means water-silver, says the Children's Encyclopedia, but the name by which it is generally known is mercury. Quicksilver is not a kind of silver, nor a mixture of water and silver, nor anything else but itself. It belongs to the group of the metals, like gold and silver, lead, iron and so on, but it is unlike all other metals in being liquid at ordinary temperatures. Quicksilver is very heavy, so that even iron and lead can float on it.

The tiny particles of quicksilver have a great attraction for each other. The reason we cannot pick up quicksilver is that it is liquid. Being a liquid, it runs, as water does, and that is what happens when it is touched. Quicksilver was discovered more than 2,000 years ago.

"A woman can't drive a nail straight."

"Not with a hammer, possibly. But you give her a hair brush and she can drive a nail as well as anybody."—Louisville Courier-Journal.

DO NOT STOP
to Figure Why a Black Hen Lays a White Egg
BUT GET THE EGG

I do not want to brag on my buying ability but feel sure I have made arrangements in the last few days that will interest and be a saving to my customers. When I am successful in buying 10 per cent cheaper I do not ask my customer to pay full price and I make the extra profit, but when I buy 10 per cent cheaper my customer gets the 10 per cent. profit. I figure on one profit no matter how cheap we buy. By contracting for 500 pairs a year I have made arrangements with the Amherst Shoe Co. for one line of shoes to sell for $4.50. This shoe is equal to any five dollar shoe sold in The Pass and a good many $5 50, being a medium weight, it is good for Sunday or every day use. I can also now offer PRESIDENT SUSPENDERS at 50c a pair.

Is there anything in all this world that is of more importance to you than good digeston? Food must be eaten to sustain life and must be digested and converted into blood. When the digestion fails the whole body suffers. Chamberlain's Tablets are a rational and reliable cure for indigestion. They increase the flow of bile, purify the blood, strengthen the stomach, and tone up the whole digestive apparatus to a natural and healthy action. For sale by all dealers.

A LARGER SCHOOL NEEDED TO ACCOMMODATE THE BIG INCREASE IN CHILDREN

Owing to the large increase in population and the many children attending school, the Blairmore school board find it incumbent upon themselves to provide suitable accommodation for the education of the boys and girls who will one day blossom into manhood and womanhood and rule the destiny of this great land.

At a meeting of the board held on Monday afternoon it was moved by Rev. J. F. Hunter and seconded by H. E. Lyon that the secretary-treasurer have plans and specifications for two additional rooms to the present school building, prepared immediately and that steps be taken towards raising the sum of $5,000, by sale of debentures in ten equal payments, the said sum to go towards covering the expense to be incurred in the erection of the proposed addition. This matter received the support of the entire board, and the secretary will act at once.

The new addition will be 34x36 feet; it will have two stories and a full size basement. The new part will be added to the northwest corner of the present building and the construction of the same will be proceeded with in the course of the next three or four weeks or as soon as the preliminary work in connection therewith is completed. The most modern desks will be installed and everything for the convenience of both the teachers and scholars will be available. A piano may be added to the school furniture in the near future so that those who may be musically inclined may have a harmonious accompaniment to some of the songs they love to sing before and after—especially after—the tedious work of the day.

Alleged Perjurers May do "Washee" at Macleod

Chinatown was agian thrown in grief and gloom on Tuesday when two of their principal inhabitants were requested by a police officer to accompany him to the jail where they were given a whole cell to themselves until about 10 o'clock when they appeared before Justice Pinkney charged by the Crown with having committed perjury in connection with some cases which engaged the attention of the court about the latter part of March.

The two celestial principals concerned in this case are Lee Tuck and Long Tan, both of Hong On & Co, laundrymen, importers and exporters of Chinese goods. They were both reprimanded to stand trial at Blairmore on Tuesday next when a large number of witnesses will be put on the stand to testify against the two alleged criminals. The Chinamen informed the court that they had some laundry in their establishment and they wished to have their freedom long enough to wash and deliver the many collars and shirts so that they would not be held accountable for the absence of any citizen from church on Sunday. The prisoners were informed that they could furnish bonds to the value of $6,000 each. They did not accept the court's offer but elected to try new diet for a few days at the police barracks at Macleod where they were conveyed by the C.P.R on Tuesday evening.

Blairmore Has Good Baker

J. Holloway has added a large delivery wagon to his business which he says is increasing more rapidly than he had anticipated. Mr. Holloway is a baker of long experience, having spent many years in some of the foremost bakeries in the Old Country before coming west. Mr. Holloway's knowledge of the bakery business is shown by the quality of his product which is second to none in this district.

Gala Day for Wearers of the Triple Link

On Sunday last Blairmore lodge, No. 68, I. O. O. F., celebrated the 93rd anniversary of Oddfellowship into America, and they did it in a way that would make the lodges in some of the cities green with envy. It was a splendid sight that many witnessed from balconies and windows as well as from the sidewalks when a small army of able bodied men, with colors flying gaily and headed by a band of twenty well-blended pieces, paraded through some of Blairmore's main thoroughfares.

At 2 p.m the members of the local lodge and several brethren from Coleman and other places met in the Oddfellows' hall, at Victoria street, where they clothed themselves in appropriate regalia and badges and after listening to two beautiful and well-rendered selections by the Bellevue band, the brethren formed in line, paraded up Victoria street as far as Fifth avenue, then back to Tenth avenue and down to the Central Baptist church where Divine service was held and where an excellent sermon was delivered before a crowded audience of earnest listeners.

The preacher on this occasion was Rev. A. S. Tod, B.D., pastor of First Presbyterian church. The reverend gentleman took as his text: "First be reconciled to thy brother," Matthew 5c. and 24v. The speaker dwelt at some length on a few of the brotherly examples set by our Saviour who uttered the words of the text during his sermon on the mount, and reminded the brethren that if they followed the principles of Oddfellowship they would carry out some of the noble teachings of the greatest Brother and Friend that the world had ever known. Continuing the speaker said that fraternity had a great and lofty meaning although it had been abused ever since the time of the French revolution, when the word received its origin. Friendship and fraternity went hand in hand and were among the greatest things on earth. Oddfellowship stood for some of the noblest principles that the world possessed. It had an ideal that led close to Christianity. The Independent Order of Oddfellows had rescued many a young man from the vortex of crime and dissipation and had saved him from destruction. Its noble work was known throughout the whole land and this society with its 2,000,000 members commanded the attention of the civilized world. Oddfellowship stood for service to humanity. It deserved success, and the success which it had already attained showed its greatness. Rev. Bro Tod advised the members to adhere to the teachings of Oddfellowship, by doing this they would learn to bless the world and lift it up.

The sermon was one of the best expositions of Oddfellowship that had ever been heard by any of the brethren. The church was literally packed, and during the whole half hour of preaching the entire audience listened with breathless silence to the interesting words which flowed freely from the reverend gentleman. After the service in the church was over, the members formed in line again and paraded up State street to Seventh avenue, down Victoria street to the hall where delectable edibles and short, spicy speeches were the order of the evening until about 6 o'clock, when this happy event came to a peaceful termination.
